CITATION AND COMMENCEMENT

This plan may be cited as Urban Utilities Water Netserv Plan 2020 (Part A).

A notice was published on 16 March 2020 for this plan for Urban Utilities' geographic area.

The commencement date for this plan was 1 July 2020.

I. Water Netserv Plan 2020 (Part A)

1.1 PRELIMINARY

- (1) This plan has been prepared in accordance with the requirements of the South East Queensland Water (Distribution and Retail Restructuring) Act 2009 (SEQ Water Act).
- (2) The purpose of this plan is:
 - (a) to provide for strategic planning for the operation of Urban Utilities' business;
 - (b) to provide planning for the delivery of infrastructure for supplying the Urban Utilities' water services and wastewater services for at least 20 years;
 - (c) to ensure the provision of safe, reliable and secure water services and wastewater services by Urban Utilities;
 - (d) to integrate land use planning and infrastructure planning for Urban Utilities' water services and wastewater services;
 - (e) to provide for the management of Urban Utilities' water services and wastewater services in a way that seeks to achieve ecological and economic sustainability;
 - (f) to provide a process for approvals for connections to Urban Utilities' water and wastewater infrastructure; and
 - (g) to state fees and charges that may be levied for connections to Urban Utilities' water and wastewater infrastructure, including trunk infrastructure.
- (3) Part A of this plan:
 - (a) states in Section 2 (Planning assumptions) the assumptions about future growth and urban development including the assumptions of demand for each trunk infrastructure network;
 - (b) states in Section 3 (Connection area and future connection area) the area that Urban Utilities:
 - (i) guarantees to provide connections to the water service or wastewater service if the connection complies with the relevant connection criteria (connection area);
 - (ii) intends to extend its infrastructure network (future connection area);
 - (c) states in Section 4 (Desired standards of service) the desired standards of performance for each infrastructure network;
 - (d) identifies in Section 5 (Plans for trunk infrastructure) the existing and future trunk infrastructure for the water and wastewater networks;
 - (e) states in Section 6 (Demand management) Urban Utilities' strategy for demand management for water; and
 - (f) states, in Section 7 (Schedules), the definitions, connection policy, including standard connection conditions, charges schedules, types of trunk infrastructure, extrinsic material mapping, schedules of work and planning density assumptions.
- (4) Urban Utilities acknowledges there will be a need to update planning assumptions over time and address any consequent implications to the Schedule of Works, as new and amended planning schemes are prepared, or if there are significant changes to transport or other infrastructure, which may influence distribution of growth. This includes changes that will support alignment to the policy of the *South-East Queensland Regional Plan* and Local Government Infrastructure Plans.

1.2 INTERPRETATION

1.2.1 Definitions

- (1) A term used in this plan has the meaning assigned to that term by one of the following:
 - (a) the SEQ Water Act;
 - (b) the *South-East Queensland Water* (*Distribution and Retail Restructuring*) *Regulation 2010* (the Regulation);
 - (c) the definitions in Schedule 1 of this plan;
 - (d) the Acts Interpretation Act 1954;
 - (e) the ordinary meaning where that term is not defined in the *SEQ Water Act*, the Regulation, Schedule 1 of this plan or the *Acts Interpretation Act 1954*.
- (2) In the event a term has been assigned a meaning in more than one of the instruments listed in subsection 1.2.1(1), the meaning contained in the instrument highest on the list will prevail.
- (3) A reference in this plan to any act includes any regulation or instrument made under the act, and where amended or replaced, if the context permits, means the amended or replaced act.
- (4) A reference in this plan to a specific resource document or standard means the latest version of the resource document or standard.
- (5) A reference to a part, section, table or schedule is a reference to a part, section, table or schedule of this plan.

1.2.2 Standard drawings, maps, notes, editor's notes and footnotes

- (1) Standard drawings contained in codes or schedules are part of this plan.
- (2) Maps provide information to support the outcomes and are part of this plan.
- (3) Notes are identified by the title 'note' and are part of this plan.
- (4) Editor's notes and footnotes are extrinsic material, as per the *Acts Interpretation Act 1954*, and are identified by the title 'editor's note' and 'footnote' and are provided to assist in the interpretation of this plan, but they are not part of the plan.

1.2.3 Punctuation

- (1) A word followed by ';' or ', and' is considered to be 'and'.
- (2) A word followed by '; or' means either or both options can apply.

1.2.4 Consistency with State and local planning provisions

1.2.4.1 Regional plan

In 2020, the Planning Minister has identified that this plan appropriately advances the South-East Queensland Regional Plan 2017 (Shaping SEQ), as it applies in the plan's area.

1.2.4.2 Local government planning assumptions

In 2020, each shareholder council being Brisbane, Ipswich, Lockyer Valley, Scenic Rim and Somerset Councils, have identified that this plan is consistent with their planning assumptions (refer to Section 2) for their respective local government areas.

2. Planning assumptions

- (1) The planning assumptions state the assumptions about:
 - (a) population and employment growth;
 - (b) the type, scale, location and timing of future development and future growth, including the demand for each trunk infrastructure network.
- (2) The planning assumptions together with the desired standards of service form a basis for the planning of the trunk infrastructure networks and the determination of the connection area and future connection area.
- (3) The planning assumptions have been prepared for:
 - (a) the base date of 2016 and the following projection years to accord with future Australian Bureau of Statistics census years:
 - (i) mid-2016;
 - (ii) mid-2021;
 - (iii) mid-2026;
 - (iv) mid-2031;
 - (v) ultimate; and
 - (b) the development types in column 2 that include the uses in columns 3 to 8 of Table 1.
- (4) Details of the methodology used to prepare the planning assumptions are stated in the extrinsic material.

2.1 POPULATION AND EMPLOYMENT GROWTH

A summary of the assumptions about population and employment growth for this plan's area is stated in Table 2.

Table 2 Population and employment assumptions

| Column 1 | | | Column 2 | | |
|----------------|---------------------|-----------|-------------|-----------|-----------|
| | | | Assumptions | | |
| Description | 2016 (Base date) | 2021 | 2026 | 2031 | Ultimate |
| Population | | | | | |
| Brisbane | 1,164,862 | 1,224,585 | 1,279,119 | 1,342,550 | 1,529,197 |
| lpswich | 202,215 | 270,820 | 354,216 | 435,897 | 518,668 |
| Lockyer Valley | 39,811 | 43,835 | 48,218 | 52,732 | 90,068 |
| Scenic Rim | 40,348 | 45,265 | 51,918 | 58,318 | 79,820 |
| Somerset | 25,616 | 28,726 | 31,616 | 34,416 | 46,883 |
| Total | 1,472,852 | 1,613,231 | 1,765,087 | 1,923,913 | 2,264,636 |
| Employment | | | | | |
| Brisbane | 848,682 | 928,708 | 1,003,392 | 1,083,306 | 1,610,196 |
| lpswich | 68,593 | 93,051 | 118,088 | 153,333 | 291,405 |
| Lockyer Valley | 11,481 | 12,555 | 13,698 | 14,903 | 19,922 |
| Scenic Rim | 14,152 | 15,381 | 16,828 | 18,491 | 21,745 |
| Somerset | 5,541 | 6,073 | 6,566 | 9,174 | 5,029 |
| Total | 948,449 | 1,055,768 | 1,158,572 | 1,279,207 | 1,948,297 |

2.2 DEVELOPABLE AREA

(1) The developable area is land zoned for residential (not including rural residential for wastewater), industrial, retail or commercial purposes and not affected by a developable area constraint stated in Table 3.

Table 3 Developable area constraints

| | Developable area constraint | |
|---|---|--|
| Agricultural land classification – class A and B | Key resource area – resource/ processing area | Key resource area – separation area |
| Key resource area – transport route | Key resource area – transport route separation area | MSES – Protected areas (estate) MSES – Declared fish habitat area |
| MSES – Protected areas (nature | MSES – Marine Park | MSES – Regulated vegetation |
| refuge) MSES – Wildlife habitat | MSES – Regulated vegetation (category B) | (category C) MSES – Regulated vegetation |
| MSES – Regulated vegetation (category R) | MSES – Regulated vegetation (essential habitat) | (wetland) MSES – High ecological |
| MSES – Regulated vegetation (intersecting a watercourse) | MSES – Strategic environmental areas (designated precinct) | significance wetlands |
| MSES – High ecological value | MSES – High ecological value | MSES – Legally secured offset area (offset register) |
| waters (wetland) | waters (watercourse) | High-pressure gas pipeline |
| MSES – Legally secured offset area | High ecological value water areas | High potential bushfire intensity |
| (regulated vegetation offsets) | Very high potential bushfire | Medium storm tide inundation |
| Bushfire prone area | intensity | areaWater treatment plants and water quality facilities (Seqwater) |

| | Developable area constraint | | |
|-----------------------------------|------------------------------------|-----------------------------------|--|
| Medium potential bushfire | Erosion prone area | Water treatment plants and water | |
| intensity | Pump station facilities and | quality facilities (Seqwater) | |
| High storm tide inundation area | reservoir facilities (Seqwater) | Facilities for extracting ground- | |

| Somerset | 393,182 | 430,212 | 464,623 | 646,409 | 357,462 |
| Total | 39,675,627 | 43,549,621 | 48,103,613 | 53,181,418 | 78,897,212 |

2.3 INFRASTRUCTURE DEMAND

The demand generation rate for a trunk infrastructure network is stated in the extrinsic material for the relevant local government area (refer to Schedule 6).

3. Connection area and future connection area

- (1) The connection area identifies the area where Urban Utilities guarantees to provide connections to its water service or wastewater service if the connection complies with the relevant connection criteria.
- (2) The future connection area identifies the area prioritised for the provision of trunk infrastructure to service the existing and assumed future urban development up to 2031.
- (3) The connection area and future connection area are identified:
 - (a) for drinking water on the relevant map in Schedule 7, Section SC7.2.1;
 - (b) for wastewater on the relevant map in Schedule 7, Section SC7.2.2.

4. Desired standards of service

- (1) This section states the standards of service for infrastructure to provide Urban Utilities' water service and wastewater service.
- (2) Unless stated otherwise in the extrinsic material contained in Schedule 6, the desired standards of service for new infrastructure are detailed in the SEQ Code and the standards and guidelines available on the **website** These documents contain a consolidated set of standards for the provision of water supply and wastewater reticulation infrastructure. A copy of the SEQ Code is available at **www.seqcode.com.au**.

5. Plans for trunk infrastructure

The plans for trunk infrastructure identify the trunk infrastructure networks intended to service the existing and assumed future urban development at the desired standard of service for at least 20 years.

5.1 PLANS FOR TRUNK INFRASTRUCTURE MAPS

- (1) The existing and future trunk infrastructure networks are shown:
 - (a) for drinking water on the relevant map in Schedule 7, Section SC7.2.1;
 - (b) for wastewater on the relevant map in Schedule 7, Section SC7.2.2.

5.2 SCHEDULE OF WORKS

- (1) The future trunk infrastructure is identified:
 - (a) for the water supply in the relevant table in Schedule 8, Section SC8.1;
 - (b) for the wastewater in the relevant table in Schedule 8, Section SC8.2.

6. Demand management

- (1) Urban Utilities proposes to achieve effective demand management outcomes for the provision of water services in the Brisbane, Ipswich, Lockyer Valley, Scenic Rim, and Somerset local government areas and the SEQ region by:
 - (a) reducing demand for water;
 - (b) increasing the efficiency of water supply works;
 - (c) increasing the efficiency of the use of water by end-users;
 - (d) substituting a process that does not use a water resource in place of a process that does use a water resource; and
 - (e) substituting one water resource for another.
- (2) Urban Utilities will publish and maintain on its website details of its strategy for demand management for water for the current financial year.

SCHEDULE 1 DEFINITIONS AND ABBREVIATIONS

Table SC1.1 Definitions

| Term | Definition |
|-------------------------------|--|
| alteration | has the meaning in the SEQ Water Act. |
| applicant | means the applicant for the application under Schedule 2 and may include the property owner, property owner's authorised agent, or property developer. |
| base date | means the date from which Urban Utilities has estimated future infrastructure demand and costs for the service area. |
| Bromelton SDA charge area | means the spatial area identified as Bromelton SDA Charge area in the Water Netserv Plan (Part A) mapping for Drinking Water and Wastewater. |
| brownfield | means an area of land previously used for industrial or other purposes available to be redeveloped for alternative purposes. |
| business days | has the meaning in the Acts Interpretation Act 1954. |
| class 10a | means a Class 10a building or structure under the Building Act 1975. |
| connection | has the meaning in the SEQ Water Act and can mean: (1) a property service connection, or (2) a network connection. |
| connection area | has the meaning in the SEQ Water Act. |
| customer service standards | means the standards of service provided to existing users as defined in our (separate) Business and Residential Customer Charters. |
| developable area | for premises, means the area of the premises that is not affected by a developable area constraint stated in Table 3. |
| future connection area | has the meaning in the SEQ Water Act. |
| greenfield | means an area that is not brownfield. |
| infrastructure | has the meaning given to water infrastructure in the SEQ Water Act which is owned and operated by Urban Utilities. |
| latent conditions | means in relation to a site and its surrounds, a physical condition or circumstance including artificial things but excluding weather conditions and the effect of weather conditions, which differs materially from the physical condition or circumstances which should reasonably have been anticipated by the applicant at the commencement of work if the applicant had carefully examined, investigated and satisfied itself in all respects as to: |
| | all written information available to the applicant, including the water approval, geotechnical reports and tenders relating to the provision of the work; |
| | (2) all information relevant to the risks, contingencies and other circumstances having an effect or potential effect on the provision of the work known to, or obtainable by the making of reasonable enquiries and investigations (including geotechnical investigations), the applicant; and |
| | (3) the site, its surrounds and all improvements and fixtures on the site or its surrounds (including all physical conditions and characteristics, facilities, services and access). |
| | Examples – Depending on the particular circumstances of work, a latent condition may include extensive rock or soil conditions that are materially or significantly harder or softer than indicated in an independent geotechnical report, extensive soil contamination that is not listed on an official register, and hidden or undisclosed utility services. |

| Term | Definition | |
|---|--|--|
| local government | has the meaning in the Local Government Act 2009. | |
| minor change | for a water approval, means a change that would not: (1) result in substantially different infrastructure; (2) apply to new land that was not the subject of the water approval application; (3) change the network; (4) result in a change in demand of 10% or more of the original demand; (5) trigger an impact that would necessitate reassessment where the connection type and location have been changed; and (6) change the non-trunk infrastructure designation of a condition. | |
| native title | has the meaning in the Native Title (Queensland) Act 1993. | |
| network connection | has the meaning in the <i>SEQ Water Act</i> and can mean: (1) the connection of network infrastructure to Urban Utilities' water infrastructure to supply a water service or wastewater service; and (2) the disconnection of network infrastructure from Urban Utilities' water infrastructure to stop supply of a water service or wastewater service; and (3) the alteration of network infrastructure; and (4) works for the matters mentioned in paragraph (1), (2) or (5) to extend or upgrade Urban Utilities' water infrastructure. | |
| non-standard connection | means a connection that is not a standard connection or a disconnection. | |
| notice | means a written notice given in accordance with Schedule 2. | |
| other plans | means locations and areas where statutory planning is undertaken by others under separate enabling legislation, such as Priority Development Areas, Port of Brisbane core port land and airports. Refer to the Water Netserv Plan (Part A) mapping for Drinking Water and Wastewater. | |
| owner | has the meaning in the SEQ Water Act. | |
| Planning Act | means the <i>Planning Act 2016.</i> | |
| planning assumption | has the meaning in the SEQ Water Act. | |
| planning regulation | means the <i>Planning Regulation 2017</i> . | |
| property service | has the meaning in the SEQ Water Act and can mean: | |
| connection | the connection of property service infrastructure to Urban Utilities' water infrastructure to supply a water service or wastewater service; and | |
| | (2) the disconnection of property service infrastructure from Urban Utilities' water infrastructure to stop supply of a water service or wastewater service; and | |
| | (3) the alteration of property service infrastructure that is part of Urban Utilities' water infrastructure. | |
| property service infrastructure | has the meaning in the SEQ Water Act. | |
| publicly- controlled place | has the meaning in the SEQ Water Act. | |
| Queensland Plumbing and Wastewater Code | has the meaning in the <i>Plumbing and Drainage Act 2018.</i> | |
| regional plan | has the meaning in the <i>Planning Act.</i> | |
| | | |

| Term | Definition | |
|---|---|--|
| security | means the security provided by an applicant that must be: (1) money; or (2) a financial institution's undertaking agreed to by Urban Utilities: (a) in favour of Urban Utilities or an entity stated in a notice given by Urban Utilities to the applicant; (b) given by a financial institution consented to by Urban Utilities; (c) under which Urban Utilities may claim a payment on demand without reference to the applicant and despite any objection, direction or claim by the applicant to the contrary; (d) under which the financial institution may make a payment on demand without reference to the applicant and despite an objection, direction or claim by the applicant to the contrary; (e) which is unlimited in time; (f) which is irrevocable and unconditional in respect of the covenants made by the financial institution in favour of Urban Utilities; (g) on terms satisfactory to Urban Utilities, including: (i) for uncompleted works, not less than 150% of the value of the uncompleted works; (ii) for completed works to be maintained for a period specified by Urban Utilities, not less than \$5,000 or 5% of the value of the completed works, whichever is greater. | |
| SEQ Water Act staged water connection | means the South-East Queensland Water (Distribution and Retail Restructuring) Act 2009. means: any connection where the applicant seeks to carry out the connection in more than one stage and Urban Utilities agrees is a staged water connection. This can include, but is not limited to: a network connection followed by a property service connection; or network connections carried out in more than one stage; or a property service connection to one or more properties carried out in more than one stage; a subsequent connection application for the subject property (including child parcels) where a water approval for a staged water connection identified that the subsequent water approval was required; a subsequent connection application for the subject property (including child parcels) where a staged development approval requires that a subsequent water approval be obtained; | |
| standard connection | has the meaning in the SEQ Water Act. | |
| trickle feed connection area | means the parts of the water service connection area that are connected, or can be connected, to an existing trickle feed system. | |
| trickle feed infill area | means the areas where an existing trickle feed system may extend. | |
| trickle feed system | means a water supply system where water is supplied to property boundaries at a constant rate of flow, with peak demands being obtained from individual storages on-site at each dwelling. | |
| ultimate | for an area or premises, means the likely extent of planning assumptions and/or schedule of works descriptions and/or types of infrastructure descriptions that are anticipated in the area or on the premises once the area or premises are fully developed. | |
| water approval | has the meaning in the SEQ Water Act. | |
| water approval condition | has the meaning in the SEQ Water Act. | |

Table SC1.2 Abbreviations

| AD | average day |
|----------|---|
| ADWF | average dry weather flow |
| Cl | chlorine |
| d | day |
| dia | diameter |
| DMA | district metered areas |
| DN | diameter nominal |
| DSS | desired standards of service |
| EP | equivalent person |
| EROS | environment release and overflow structures |
| ET | equivalent tenement |
| FF | fire flow |
| GFA | gross floor area |
| GWI | groundwater infiltration |
| kW | kilowatt |
| L | litre |
| LGIP | Local Government Infrastructure Plan - as defined in the Planning Act. |
| m | metre |
| MDMM | mean day maximum month |
| MH | maintenance hole (manhole) |
| MSES | matters of state environmental significance |
| OD | on demand |
| PD | peak day |
| PDWF | peak dry weather flow as defined in the SEQ Code (Glossary and Abbreviations) |
| PFTI | plans for trunk infrastructure |
| PE | polyethylene |
| PH | peak hour |
| PPM | parts per million |
| PRV | pressure reducing valve |
| PS | pump station |
| PWWF | peak wet weather flow |
| RPEQ | Registered Professional Engineer of Queensland |
| S | second |
| SDA | State development area |
| SEQ | South East Queensland |
| SEQ Code | South East Queensland Water Supply and Sewerage Design and Construction Code |
| SF | sanitary flow |
| V | volume (operating) |

SCHEDULE 2 CONNECTIONS POLICY

SC2.1 Purpose and content

- (1) The connection policy states Urban Utilities' policy for connections, disconnections and alterations to its infrastructure networks for its water service and wastewater service.
- (2) The connection policy includes:
 - (a) the areas (each a connection area) in which Urban Utilities guarantees to provide connections that comply with its connection criteria to its water service or wastewater service;
 - (b) the areas (each a future connection area) in which Urban Utilities intends to extend its infrastructure network;
 - (c) the areas where connections to existing trickle feed systems may occur and the areas where existing trickle feed systems may be extended;
 - (d) the circumstances in which Urban Utilities may approve a connection outside a connection area;
 - (e) Urban Utilities' criteria for providing a connection, with or without conditions, to its water service or wastewater service, including:
 - (i) Urban Utilities' criteria and conditions for a standard connection;
 - (ii) Urban Utilities' criteria for a staged water connection;
 - (iii) Urban Utilities' criteria for other categories of connections.
 - (f) the way to apply for a water approval;
 - (g) the categories of connections to which it may delegate its decision function under Section 53 of the SEQ Water Act;
 - (h) the timeframes for its decisions for connections other than a standard connection;
 - (i) its conditions for when a water approval lapses; and
 - (j) its requirements for construction maintenance and defects liability
- (3) In this connection policy, the connection area and future connection area are identified in schedule 7.
- (4) The process for obtaining and completing a water approval generally consists of:
 - (a) application;
 - (b) assessment;
 - (c) approval;
 - (d) design;
 - (e) construction;
 - (f) compliance.

Further details on the water approval process can be found at **www.urbanutilities.com.au.** Instructions on how to make a properly made application can be found in the Urban Utilities' **Check for Completeness Guideline.**

SC2.2 Connection criteria

This connection policy identifies the criteria for providing a connection, disconnection or alteration to its drinking water, recycled water or wastewater services. All applications are for a water approval, which can be either a property service connection or a network connection. Specific types of connections are:

- (a) standard connection, which is a simplified property service connection, in Section SC2.2.1;
- (b) non-standard connection comprising:
 - (i) non-staged connections, in sections: SC2.2.2.1 (all infrastructure), SC2.2.2.2 (drinking water), SC2.2.2.3 (trickle feed connection area drinking water), SC2.2.2.4 (recycled water), SC2.2.2.5 (wastewater), and SC2.2.2.7 (connection that is outside the future connection area or not consistent with planning assumptions);
 - (ii) staged connection, in Section SC2.2.2.6; and
- (c) disconnection, in Section SC2.2.3.

SC2.2.1 Standard connection criteria

- (1) The purpose of the standard connection criteria is to assess an application for a standard connection.
- (2) A connection that complies with all the relevant criteria in Table SC2.2.1 is a standard connection for the purpose of this connection policy.
- (3) A standard connection also includes any disconnection or alteration of a connection that complies with the relevant criteria in Table SC2.2.1.

Editor's note: for further standard connection process guidance please refer to the online Standard <i>Connection Guidelines.

Table SC2.2.1 Standard connection only

| Common | | | |
|---------------------|---|---|--|
| Connection Criteria | | | |
| All alte | All alterations of a connection (not involving works) | | |
| AC1 | | perty service infrastructure must be inspected by Urban Utilities, or an inspector accredited by an Utilities. | |
| AC2 | | altered property service infrastructure must comply with Urban Utilities' design and struction standards, including the SEQ Code. | |
| | | or's note: Under the Plumbing and Drainage Act 2018, a water meter (sub-meter) is required each lot within a community title scheme, in accordance with: | |
| | (1) | the Queensland Plumbing and Wastewater Code; and | |
| | (2) | Urban Utilities Sub-Metering Standards. | |
| AC3 | Urb | an Utilities' DSS must be achieved at the point of connection. | |
| All new | / conr | nections | |
| SC1 | (1) | Subject to subsection (2), the connection must service a: | |
| | | (a) dwelling house, including: | |
| | | (i) 1 dwelling for a single household and any domestic outbuildings associated with the dwelling; or | |
| | | (ii) 1 dwelling for a single household, a secondary dwelling and any domestic outbuildings associated with either dwelling; or | |
| | | (b) dual occupancy under a community titles scheme under the <i>Body Corporate and Community Management Act 1997</i> ; or | |
| | | (c) multiple dwelling on up to 3 residential lots with a maximum of 6 dwellings of up to 3 storeys; or | |
| | | (d) existing single residential lot or each proposed lot in a 3-lot residential subdivision; or, | |
| | | (e) maximum 3-lot residential amalgamation. | |
| | (2) | All residential lots, dwelling houses, occupancies in a dual occupancy or dwellings in a multiple dwelling must have street frontage and no common water consumption. Each lot, dwelling or occupancy must have its own water meter with no submetering. Any arrangement that requires submetering will be considered a non-standard connection. | |
| | | or's note: The owner must ensure appropriate building fire measures under the Building Act 5 and related regulations, codes and guidelines. | |
| SC2 | (1) | The required property service infrastructure must comply with Urban Utilities' design and construction standards, including the SEQ Code. | |
| | (2) | The property service connection must not require any work to Urban Utilities network infrastructure to enable the property service connection. | |
| | (3) | The property service infrastructure must not cross, or require works in or adjacent to, a Department of Transport and Main Roads controlled road corridor (including footpath and bikeways). | |
| SC3 | | perty service infrastructure must be provided by Urban Utilities, or a constructor accredited by an Utilities which requires payment of a property service works charge. | |

| SC4 | The property service infrastructure must not require works: in a Queensland heritage place; or in an area with potential for unexploded ordnance; or in a State transport corridor; or seaward of the coastal building line; or clearing State and local protected vegetation; or clearing wetlands and waterways; or |
|---------|---|
| | (g) clearing fish habitat; or |
| | (h) in a trunk transport infrastructure corridor in the relevant LGIP. (2) For building types 1 and 10, property service infrastructure shall be located in compliance with MP1.4 of the Queensland Development Code. |
| | (3) For building types 2-9 inclusive, all parts of the connection must not be within 1.5m from the footing for the building or structure and clear zone above the infrastructure no less than 2.4m from the finished surface level. |
| SC5 | The site, including the entire route for any required property service infrastructure, must not be subject to constraints such that property service infrastructure cannot be designed and constructed in accordance with the Urban Utilities Design and Construction Standards, including the SEQ Code. Site constraints may include but are not limited to: (a) physical obstructions; (b) environmental constraints; (c) site or ground conditions; (d) safety risks; and (e) legislative or regulatory restrictions, including protected vegetation. |
| All new | v connections to the drinking water service |
| SDC1 | (1) The property must be located in the drinking water connection area. |
| | (2) The connection must service development that is consistent with the planning assumptions. |
| SDC2 | The connection must comprise a single property service of no more than 32mm PE (25mm internal diameter) at the connection point. |
| SDC3 | (1) The property service connection must be made to a reticulation main of 300mm (nominal diameter) or less, excluding mains that are not suitable for individual property service connections due to the function the main performs. |
| | (2) The property service connection must not have a depth at the point of connection greater than 1.5m to the invert level. |
| | (3) The property service connection must not have a length greater than 40m. |
| SDC4 | Urban Utilities' DSS must be achieved at the point of connection. |
| All new | v connections to the wastewater service |
| SWC1 | (1) The property must be located in the wastewater connection area. |
| | (2) The connection must service development that is consistent with the planning assumptions. |
| SWC2 | The connection must comprise a single property service connection no more than DN160mm. |
| SWC3 | (1) The property service connection must be made to a wastewater main less than 300mm (nominal diameter). |
| | (2) The property service connection must not have a depth at the connection point greater than 1.5m to the invert level. |
| | (3) The property service connection must not be made to a wastewater main at depths greater than 3m to the invert level. |
| | (4) The property service connection must not have a length greater than 10m. |
| SWC4 | The land topography must enable the property drainage to gravitate to the existing wastewater network. |

SWC5 Where a property service connection may cross an existing or planned on-ground or underground service, including road, reticulated wastewater main, water supply, stormwater drainage, electricity, and telecommunications, such crossing must be executed in accordance with the relevant provisions contained within the SEQ Code.

Editor's note: If the land related to the standard connection is land other than a publicly controlled place and the person making the request is not the owner of the land, the applicant is required to provide the owners' written consent to the connection.

SWC6 Urban Utilities' Customer Service Standards must be achieved at the point of connection.

SC2.2.2 Non-standard connection criteria

SC2.2.2.1 Non-standard connection criteria - all infrastructure

- (1) The purpose of the non-standard connection criteria is to assess an application for a nonstandard connection other than a standard connection.
- (2) Subject to SC2.2.2.2, SC2.2.2.3, SC2.2.2.4, SC2.2.2.5, SC2.2.2.6 and SC2.2.2.7, a non-standard connection that complies with the criteria in Table SC2.2.2.1 is a non-standard connection for the purpose of this connection policy.

Table SC2.2.2.1 Non-standard connection - all infrastructure

| All new c | onnections | |
|----------------------|---|--|
| NSC1 | The connection must service development that is consistent with the planning assumptions. | |
| NSC2 | Where in the future connection area, all trunk drinking water or wastewater infrastructure are designed, constructed and altered in accordance with the plans and other information identified in a water supply or wastewater network analysis and master plan prepared and certified in accordance with a water approval for a staged connection. | |
| Drinking | water, recycled water or wastewater infrastructure in the road reserve | |
| DWWR1 | Water and wastewater mains (diameter less than 300mm) maintain an alignment within the road reserve in accordance with: | |
| | (1) the version of the relevant local government authorities' service corridor alignment drawings current at the time the water approval application is lodged; or | |
| | (2) another alignment to that stated in (1) above, upon provision of evidence of agreement of the alternative alignment from the relevant local government authority. | |
| Drinking heritage | water, recycled water or wastewater infrastructure in or near a State or local place | |
| DWWWH1 | Water mains, wastewater gravity mains or wastewater rising mains (other than the property service infrastructure) are not located in a State or local heritage place. | |
| Drinking | water, recycled water or wastewater infrastructure in or near an infrastructure corridor | |
| DWWWC1 | Unless otherwise approved by the relevant authority, water mains, wastewater gravity mains o wastewater rising mains are not located in a State transport corridor, high pressure gas pipelin corridor, electrical or bulk water supply corridor. | |
| DWWWC2 | Unless otherwise approved by the relevant authority, where the crossing of State transport, high pressure gas, electrical or bulk water supply corridor by a water main, wastewater gravity main or wastewater rising main cannot be avoided: | |
| | (1) pipe infrastructure is upsized to cater for additional future demand without additional disturbance; and | |
| | (2) tunnel boring techniques, where appropriate, are used to minimise disturbance; and | |
| | (3) disturbed areas are reinstated and revegetated on completion of works; and | |
| | (4) the crossing is at angles between 60 and 90 degrees to the State transport, electrical or bulk water supply infrastructure. | |

Drinking water, recycled water or wastewater infrastructure in or near an area of environmental significance, waterway or wetland

| DWWWE1 | A discharge area for a wastewater treatment facility, water mains, wastewater gravity main or wastewater rising mains are not located in an area of environmental significance, waterway or wetland. |
|----------|---|
| DWWWE2 | Unless otherwise approved by the relevant authority, where the crossing of an area of environmental significance, waterway or wetland by a water main, wastewater gravity main or wastewater rising main cannot be avoided: |
| | (1) pipe infrastructure is upsized to cater for additional future demand without additional disturbance; and |
| | (2) tunnel boring techniques, where appropriate, are used to minimise disturbance; and |
| | (3) disturbed areas are reinstated and revegetated on completion of works; and |
| | (4) the crossing of the area of environmental significance wetland or waterway is at smallest possible distance. |
| Drinking | water, recycled water or wastewater infrastructure in or near a water supply buffer area |
| WSBA1 | A discharge area for a wastewater treatment facility is not located in a water supply buffer area. |

WSBA2 EROS are not located in a water supply buffer area.

SC2.2.2.2 Non-standard connection criteria - drinking water

- (1) The purpose of the non-standard connection criteria for drinking water is to assess an application for a drinking water non-standard connection, other than a standard connection.
- (2) Subject to SC2.2.2.1, a drinking water non-standard connection that complies with the criteria in Table SC2.2.2.2 is a drinking water non-standard connection for the purpose of this connection policy.

Table SC2.2.2.2 Non-standard connection - drinking water

| Drinking | water infrastructure – design and construction standards | |
|----------|---|--|
| DWCS1 | All drinking water network infrastructure and property service infrastructure are designed, constructed and altered in accordance with the plans and other information identified in the SEQ Code and the relevant standards and guidelines available at www.urbanutilities.com.au . | |
| DWCS2 | Existing Urban Utilities' drinking water network and/or property service infrastructure is modified, at no cost to Urban Utilities. This includes: | |
| | where not required for existing or future development, removing any existing drinking water network and/or property service infrastructure and sealing any connection to remaining network infrastructure; | |
| | (2) relocating any values, fire hydrants and scours from within the limits of vehicular footway crossings; | |
| | (3) raising or lowering mains to current standards if development works change the depth of cover on these works; and | |
| | (4) where a road opening or widening is required, relocating existing drinking water mains clear of the proposed carriageway as specified in current standards. | |
| DWCS3 | (1) Drinking water infrastructure cannot comprise a new trickle feed system. | |
| | (2) Drinking water network infrastructure and property service infrastructure may involve an extension of an existing trickle feed system only if the property is within the trickle feed infill area. | |
| DWCS4 | Where a fully reticulated drinking water supply cannot be reasonably delivered in compliance with the Urban Utilities' design and construction standards, including the SEQ Code, trickle feed connections to new lots must: | |
| | (1) be designed and constructed in accordance with a water supply network analysis prepared and certified by an RPEQ and agreed by Urban Utilities; and | |
| | (2) deliver water pressure or water flow to property service infrastructure as follows: (a) water pressure is to be not less than 12 metres head of water at the property | |
| | boundary; and | |
| | (b) water flow is to be not less than 3.2 litres per minute and no more than 4.0 litres per minute; and | |
| | (c) a flow restrictor allowing for (a) and (b) to be installed with property service infrastructure. | |
| | Editor's note: The owners of new lots must also install appropriate on-site bushfire hazard and building fire measures in accordance with the relevant planning scheme, Building Act 1975 and related regulations, codes and guidelines. | |
| Drinking | water network infrastructure (trunk infrastructure) | |
| DWNT1 | All drinking water infrastructure is designed, constructed and altered in accordance with the plans and other information identified in the: (1) DSS; and (2) PFTI. | |
| DWNT2 | A water treatment facility, chlorination facility, water storage facility and water pump station (including boosters) maintain a setback of at least 20m from any buildings or structures (other than Class 10a buildings and structures). | |
| DWNT3 | Ownership of the drinking water infrastructure is transferred to Urban Utilities at no cost to Urban Utilities. | |

| Drinking | water network infrastructure (non-trunk infrastructure) |
|----------|---|
| DNNT1 | All drinking water infrastructure, together with valves and fire hydrants, is connected to existing Urban Utilities' drinking water infrastructure. |
| DNNT2 | Ownership of the drinking water infrastructure is transferred to Urban Utilities, at no cost to Urban Utilities. |
| Drinking | water property service infrastructure |
| DWPNT1 | A drinking water property service connection is supplied and installed to the boundary of each proposed lot in the development which connects into Urban Utilities' drinking water infrastructure. This includes an approved metering arrangement. |
| DWPNT2 | No water is drawn from Urban Utilities' water supply infrastructure unless it is provided through an approved metering arrangement. |
| DWPNT3 | A separate drinking water property service connection which commands the whole lot, is provided for each proposed lot. |
| DWPNT4 | A water meter is provided in accordance with Urban Utilities Metering Standards. |
| | Editor's note: Under the Plumbing and Drainage Act 2018, a water meter (sub-meter) is required for each lot within a community title scheme, in accordance with: |
| | (1) the Queensland Plumbing and Wastewater Code; and |
| | (2) Urban Utilities Sub-Metering Standards. |
| DWPNT5 | A separate master meter is provided for each body corporate where there are one or more body corporates in each development. |
| DWPNT6 | Existing Urban Utilities' drinking water infrastructure is modified, at no cost to Urban Utilities This includes relocating any existing water meters or valves from within the limits of the development's proposed footway crossings, e.g. driveways. |
| DWPNT7 | Existing property service connections to Urban Utilities' network infrastructure that are not required for future development are removed and sealed, at no cost to Urban Utilities. |
| DWPNT8 | Ownership of the drinking water property service infrastructure located outside the boundary of the lot or proposed lots, and water meters and sub-meters is transferred to Urban Utilities, at no cost to Urban Utilities. |
| Drinking | water quality management |
| DWQM1 | All drinking water is provided in accordance with the standards identified in the <i>Public Health Regulation 2018</i> . |
| DWQM2 | All drinking water is verified in accordance with water quality testing conducted in accordance with the SEQ Code by a laboratory with National Association of Testing Authoritie Australia registration. |
| | |

SC2.2.2.3 Non-standard connection criteria – Drinking Water: Trickle Feed Connection Area Drinking Water

- (1) The purpose of the non-standard connection criteria for drinking water: trickle feed connection area drinking water, is to assess an application for a non-standard drinking water connection for a dwelling house on an existing lot located in the trickle feed connection area.
- (2) A connection that complies with the criteria in Table SC2.2.2.3 (the trickle feed area connection criteria) is a non-standard connection for the purpose of this connection policy.
- (3) Assessment of a connection for a dwelling house on an existing lot in the trickle feed connection area will be in accordance with SC2.2.1 (Standard Connection only) except where there is an inconsistency with Table SC2.2.2.3, in which case the provisions in Table SC2.2.2.3 will apply.

Table SC2.2.2.3 Non-standard connection Trickle Feed Area Connection Criteria - connections to the drinking water service for a dwelling house on an existing lot

| All alter | ations | of a connection (not involving works) to the drinking water service |
|-----------|--------|--|
| TFAC1 | (1) | Subject to subsection (2), the altered property service infrastructure must comply with Urban Utilities' design and construction standards, including the SEQ Code. |
| | (2) | If the property service infrastructure cannot reasonably be altered to deliver a fully reticulated drinking water supply in compliance with the Urban Utilities' design and construction standards, including the SEQ Code, the following applies: (a) water pressure is to be not less than 12 metres head of water at the property boundary; (b) water flow is to be not less than 3.2 litres per minute and no more than 4.0 litres per minute; and (c) a flow restrictor allowing for (a) and (b) is installed. |
| TFAC2 | (1) | The altered property service infrastructure must service a: (a) dwelling house, including: (i) 1 dwelling for a single household and any domestic outbuildings associated with the dwelling; or (ii) 1 dwelling for a single household, a secondary dwelling and any domestic outbuildings associated with either dwelling; and (b) existing lot within any of the following zones under the relevant local government's planning scheme: (i) Rural zone; (ii) Rural residential zone. |

| All new o | nnections to the drinking water service |
|-----------|---|
| TFDC1 | Subject to subsection (2), the connection must service a: (a) dwelling house, including: (i) 1 dwelling for a single household and any domestic outbuildings associated with the dwelling; or (ii) 1 dwelling for a single household, a secondary dwelling and any domestic outbuildings associated with either dwelling; and (b) existing lot within any of the following zones under the relevant planning scheme: |
| | Editor's note: The owner must also install appropriate on-site bushfire hazard and building fire measures in accordance with the relevant planning scheme, Building Act 1975 and related regulations, codes and guidelines. |
| TFDC2 | (1) The property service connection must not require any work to Urban Utilities network infrastructure to enable the property service connection. |
| | (2) The property service infrastructure must not cross, or require works in or adjacent to, a Department of Transport and Main Roads controlled road corridor (including footpath and bikeways). |
| | (3) Subject to subsection (4), the required property service infrastructure must comply with Urban Utilities' design and construction standards, including the SEQ Code. |
| | (4) If the property service infrastructure cannot reasonably be altered to deliver a fully reticulated drinking supply in compliance with the Urban Utilities' design and construction standards, including the SEQ Code, the following applies: (a) water pressure is to be not less than 12 meters head of water at the property boundary; (b) water flow is to be not less than 3.2 litres per minute and no more than 4.0 litres per minute; and (c) a flow restrictor allowing for (a) and (b) is installed. |
| TFDC3 | (1) The existing lot must be located (either partly or completely) in the trickle feed connection area part of the drinking water connection area. |
| | Editor's note to remove any doubt: (a) The extent of the property connection owned and operated by Urban Utilities generally terminates at the property boundary. The property owner is responsible for connection from the property boundary to a dwelling house. (b) The existing lot must be located (either partly or completely) in the trickle feed connection area. A dwelling house (or a secondary dwelling or associated outbuildings on the property) is not required to be located within the trickle feed connection area. |

SC2.2.2.4 Non-standard connection criteria – recycled water

- (1) The purpose of the non-standard connection criteria for recycled water is to assess an application for a recycled water non-standard connection other than a standard connection.
- (2) Subject to SC2.2.2.1, a recycled water non-standard connection that complies with the criteria in Table SC2.2.2.4 is a recycled water non-standard connection for the purpose of this connection policy.

Table SC2.2.2.4 Non-standard connection - recycled water

Recycled water infrastructure - design and construction standards

RWCS1 All recycled water network infrastructure and property service infrastructure are designed, constructed and altered in accordance with the plans and other information identified in the SEQ Code and the relevant standards and guidelines available at **www.urbanutilities.com.au**.

Recycled water network infrastructure (non-trunk infrastructure)

- RNNT1 A water treatment facility, chlorination facility, water storage facility and water pump station (including boosters) maintains a setback of at least 20m from any buildings or structures (other than Class 10a buildings and structures).
- RNNT2 Recycled water network infrastructure, together with valves and fire hydrants, is connected to the existing Urban Utilities recycled water network infrastructure.
- RNNT3 Ownership of the recycled water infrastructure is transferred to Urban Utilities, at no cost to Urban Utilities.
- RNNT4 Existing Urban Utilities' recycled water network and/or property service infrastructure is modified, at no cost to Urban Utilities. This includes:
 - (1) where not required for existing or future development, removing any existing recycled water network and/or property service infrastructure and sealing any connection to remaining network infrastructure;
 - (2) relocating any valves and scours from within the limits of vehicular footway crossings;
 - (3) raising or lowering mains to current standards if development works to change the depth of cover on these works; and
 - (4) where a road opening or widening is required, relocating existing recycled water mains clear of the proposed carriageway as specified in current standards.

Recycled water property service infrastructure

| RWPNT1 | A recycled water property service connection is supplied and installed to the boundary of each proposed lot in the development which connects to Urban Utilities' recycled water infrastructure. This includes an approved metering arrangement. |
|----------|---|
| RWPNT2 | No recycled water is drawn from Urban Utilities' water supply network unless provided through an approved metering arrangement. |
| RWPNT3 | A water meter (sub-meter) is provided for each lot within a community title scheme, in accordance with: |
| | (1) the Queensland Plumbing and Wastewater Code; and |
| | (2) Urban Utilities Sub-Metering Standards. |
| RWPNT4 | A separate master meter is provided for each body corporate where there are one or more body corporates in each development. |
| RWPNT5 | Existing Urban Utilities' recycled water property service infrastructure is modified, at no cost to Urban Utilities. This includes relocating any existing water meters or valves from within the limits of the development's proposed footway crossings, e.g. driveways. |
| RWPNT6 | Existing recycled water property service connections to Urban Utilities' recycled water network infrastructure that are not required for future development are removed and sealed, at no cost to Urban Utilities. |
| RWPNT7 | Ownership of the recycled water property service and network infrastructure located outside the boundary of the lot or proposed lots, water meters and sub-meters are transferred to Urban Utilities, at no cost to Urban Utilities. |
| Recycled | Water Quality Management |
| RWQM1 | All recycled water is provided in accordance with the standards identified in Urban Utilities Recycled Water Management Plan. |

SC2.2.2.5 Non-standard connection criteria – wastewater

- (1) The purpose of the non-standard connection criteria for wastewater is to assess an application for a wastewater non-standard connection other than a standard connection.
- (2) Subject to SC2.2.2.1, a wastewater non-standard connection that complies with the criteria in Table SC2.2.2.5 is a wastewater non-standard connection for the purpose of this connection policy.

Table SC2.2.2.5 Non-standard connection - wastewater

Wastewater infrastructure - design and construction standards

WWDC1 All wastewater network infrastructure and property service infrastructure are designed, constructed and altered in accordance with the plans and other information identified in the SEQ Code and the relevant standards and guidelines available at **www.urbanutilities.com.au**.

Wastewater network infrastructure (trunk infrastructure)

- WWNT1 All wastewater network infrastructure is designed, constructed and altered in accordance with the plans and other information identified in the
 - (1) DSS; and
 - (2) PFTI.
- WWNT2 (1) Wastewater pumping stations (\leq 350 L/s) maintain a setback of at least 50m from any sensitive land uses and any buildings other than Class 10 buildings and structures.
 - (2) Wastewater pumping stations (>350 L/s) maintain a setback of at least 150m from any sensitive land uses and any buildings other than Class 10 buildings and structures.

Editor's note: If the centre of the proposed pumping station site is less than the above set back distances from the closest or potentially closest sensitive use, building or structure, the location of the site must be discussed with Urban Utilities.

Wastewater network infrastructure (non-trunk infrastructure)

- WWNN1 Existing wastewater network infrastructure connected to Urban Utilities' network infrastructure that is not required for future development are removed and sealed in accordance with Urban Utilities' requirements, at no cost to Urban Utilities.
- WWNN2 Ownership of the wastewater network infrastructure is transferred to Urban Utilities, at no cost to Urban Utilities.
- WWNN3 Existing Urban Utilities wastewater network infrastructure is modified, at no cost to Urban Utilities. This includes relocating any existing wastewater property service infrastructure from within the limits of the development's proposed vehicular footway crossings.
- WWNN4 Where existing wastewater maintenance holes do not have the current standard top slab, cover and frame, or there are changes to the surface levels, or there are changes to the loading conditions, the maintenance holes are modified at no cost to Urban Utilities, to accord with the current standards.

Wastewater property service infrastructure

- WWPN1 Where existing or new wastewater property service infrastructure on private property will be located under reinforced concrete slabs, a removable slab consistent with the specifications identified in the SEQ Code is provided.
- WWPN2 A separate wastewater property service connection which commands the whole lot is provided for each proposed lot.
- WWPN3 A wastewater property service connection is supplied and installed to each proposed lot in the development which connects into Urban Utilities' wastewater infrastructure.

Wastewater infrastructure within a sewage overflow management area

WWOM1 If deemed necessary by Urban Utilities, telemetry, monitoring and control equipment is installed where and at a date agreed with Urban Utilities.

SC2.2.2.6 Non-standard connection criteria – staged water connection

- (1) The purpose of the staged connection criteria is to assess an application for a staged connection, other than a standard connection.
- (2) Subject to SC2.2.2.1 and where relevant SC2.2.2.2, SC2.2.2.3, SC2.2.2.4, SC2.2.2.5, and SC2.2.2.7 a staged connection that complies with the criteria in Table SC2.2.2.6 is a staged connection for the purpose of this connection policy.
- (3) A water approval for a staged connection only authorises connection to the extent specified in the approval. To avoid any doubt, a water approval for a staged water connection may not authorise any connection.
- (4) In assessing a staged connection application, Urban Utilities will consider the charges and conditions applied to any previous water approval for a staged connection.

Table SC2.2.2.6 Staged connection criteria

All staged connections

| STC1 | The relevant connection criteria are set out in SC2.2.2 for a non-standard connection. |
|------|---|
| STC2 | A staging plan must be submitted setting out the proposed stages of the staged connection and the servicing strategy to effect the connection. |
| | (2) The servicing strategy must include a sufficient level of detail to identify the demand for each stage and proposed servicing solution including any property service infrastructure or network infrastructure required. |
| STC3 | The staged connection must be consistent with any requirements and conditions specified in a water approval that applies to the property. |
| STC4 | The staged connection must service development that is consistent with the planning assumptions. |
| STC5 | Where in the future connection area, all trunk drinking water or wastewater infrastructure are designed, constructed and altered in accordance with the plans and other information identified in a water supply or wastewater network analysis and master plan prepared and certified by an RPEQ and agreed by Urban Utilities as: |
| | the best value cost option for servicing the development in terms of type, size and location of infrastructure; and |
| | (2) based on the life cycle cost of the infrastructure required to service future development at the DSS. |

SC2.2.2.7 Non-standard connection criteria – Connection that is outside the future connection area or not consistent with planning assumptions

- (1) The purpose of the non-standard connection criteria is to assess an application for a non-standard connection, other than a standard connection:
 - (a) outside of the future connection area; or
 - (b) not consistent with the planning assumptions.
- (2) Subject to SC2.2.2.1 and where relevant SC2.2.2.2, SC2.2.2.3, SC2.2.2.4, SC2.2.2.5, and SC2.2.2.6, a non-standard connection that complies with the criteria in Table SC2.2.2.7 is a non-standard connection for the purpose of this connection policy.

Table SC2.2.2.7 Non-standard connection – outside of the future connection area or not consistent with planning assumptions

All Infrastructure

OFC2

- OFC1 Urban Utilities may approve a new connection or an alteration of an existing connection that is outside a future connection area or not consistent with the planning assumptions if Urban Utilities is satisfied that:
 - (1) the applicant can be conditioned to provide all non-trunk infrastructure necessary to service the connection;
 - (2) the capacity of the existing water infrastructure network is sufficient to service the connection, or sufficient water infrastructure network capacity can be provided safely, efficiently, effectively and equitably to service the connection;
 - (3) the connection does not utilise existing capacity that has been created or allocated for other planned connections;
 - (4) the connection will not compromise or make more difficult:
 - (a) the efficient and effective planning for water infrastructure;
 - (b) the coordination and integration of water infrastructure planning and land use planning;
 - (c) the sequencing of water infrastructure to minimise the lifecycle cost for the water infrastructure;
 - (d) the delivery of water infrastructure in a logical and orderly location, form and sequence;
 - (e) the implementation of current water approvals; and
 - (f) the operation of water infrastructure and the delivery of water services and wastewater services,
 - (5) the connection will not compromise the financial viability and feasibility of infrastructure provision by Urban Utilities;
 - (6) for a connection outside the connection area and future connection area, the connection will not compromise or make more difficult compliance with the provisions in Urban Utilities' schedule of works, including the planning assumptions, the desired standards of service and the type, scale, location and timing of planned works;
 - (7) any required trunk infrastructure does not require Urban Utilities to incur infrastructure costs.
 - All infrastructure is designed, constructed and altered in accordance with the plans and other information identified in a network analysis and master plan prepared and certified by an RPEQ and agreed by Urban Utilities as:
 - (1) the best value cost option for servicing the development in terms of type, size and location of infrastructure; and
 - (2) based on the life cycle cost of the infrastructure required to service future development at the DSS.

Editor's note: life cycle costing must be in accordance with the requirements of the SEQ Code.

SC2.2.3 Disconnection criteria

- (1) The purpose of the disconnection criteria is to assess an application.
- (2) A disconnection that complies with the criteria in Table SC2.2.3 is a disconnection for the purpose of this connection policy.
- (3) A disconnection of a connection that complies with the relevant criteria in Table SC2.2.1 is also a disconnection for the purpose of this connection policy.
- (4) Urban Utilities may elect not to authorise a permanent disconnection if a building or other structure remains on the property.
- (5) Urban Utilities may allow the property owner to make temporary disconnections to the water supply network, such as where the water meter is retained pending redevelopment.
- (6) The property owner or their agent must ensure the protection of the remaining infrastructure against physical damage or water theft.

Table SC2.2.3 Disconnection criteria

Disconnection criteria

All disconnections

- D1 The disconnection must be for one of the following purposes:
 - (1) to enable the demolition of buildings; or
 - (2) to enable the alteration and installation of new property service connection or network connection; or
 - (3) to enable a relocation of existing property service infrastructure.
- D2 The discontinuation of service must not adversely affect the networks' capacity to service existing or future development.
- D3 The disconnection must reinstate the water supply or wastewater infrastructure to comply with Urban Utilities' design and construction standards, including the SEQ Code.

Disconnection to Water Supply service

- D4 Disconnection of a water supply service must ensure:
 - (1) the service is plugged, and the water meter is removed in accordance with conditions determined by Urban Utilities.
 - (2) the water meter must be returned to Urban Utilities.

Disconnection to Wastewater Services

D5 The service is plugged in accordance with conditions determined by Urban Utilities.
SC2.3 Standard connection condition

Table SC2.3.1 Standard conditions for standard connections

| Со | ndition | Timing |
|-----|---|---|
| All | standard connections and alterations to standard connections (excl | luding disconnections) |
| (1) | All works necessary for the property service connection(s) must be carried out by Urban Utilities or its authorised representative. | At all times |
| (2) | The applicant must pay the connection charge and property service works charge for the supply of property service infrastructure. | As specified in the decision notice |
| (3) | The applicant must pay the adopted infrastructure charge for the connection. | As specified in the infrastructure charges notice |
| (4) | Each property service connection must only supply a single vacant residential lot, a dwelling house, an occupancy in a dual occupancy or dwelling in a multiple dwelling. | At all times |
| (5) | The connection of plumbing and drainage must not occur to property service infrastructure until a connection certificate is issued by Urban Utilities. | Prior to issuing of the connection certificate |
| (6) | This water approval lapses if the works for the connection: (a) have not been started within 12 months from the date the notice is issued; or (b) have been started but the connection has not been completed within 15 months from the date that the notice is issued. | At all times |
| (7) | This water approval is subject to Urban Utilities (or its authorised representative) being able to obtain any legislated third-party approvals for the works. | At all times |
| (8) | This water approval is subject to the landowner consenting to Urban Utilities and its authorised representatives accessing the subject property to carry out the works. | At all times |
| (9) | Pegs must be installed on the subject property to delineate the real property boundary. | Prior to construction |
| Wa | stewater service standard connections | |
| (10 |) The owner must ensure that lot drainage gravitates to the property service infrastructure. Alternatively, the owner must install and maintain pumps sufficient to discharge wastewater to property service infrastructure. | At all times |
| Dr | inking water service standard connections | |
| (11 |) If required, the owner must install and maintain enough water storage tanks and pumps to ensure that water can be supplied at a satisfactory pressure and flow. | At all times |

| Condition | Timing |
|--|-------------------------------------|
| Disconnection of standard connections | |
| (12) All works necessary for disconnection must be carried out by Urban Utilities or its authorised representative. | At all times |
| (13) The applicant must pay the connection charge and property service works charge for the disconnection of property service infrastructure. | As specified in the decision notice |
| (14) This water approval lapses if the works for the disconnection: | At all times |
| (a) have not been started within 12 months from the date the notice is issued; or (b) have been started but the connection has not been completed within 15 months from the date that the Notice is issued. | |
| (15) This water approval is subject to Urban Utilities (or its authorised representative) being able to obtain any legislated third-party approvals for the works. | At all times |
| (16) This water approval is subject to the landowner consenting to Urban Utilities and its authorised representatives accessing the subject property to carry out the works. | At all times |

SC2.4 Request for a services advice notice

The purpose of SC2.4 is to state the way to request a service advice notice.

SC2.4.1 Lodging a request for a services advice notice

- (1) A person may, by notice, ask Urban Utilities for a services advice notice.
- (2) The request:
 - (a) if Urban Utilities has a form for the request, must be in that form; and
 - (b) must be accompanied by the required fee.
- (3) Where the request does not comply with the criteria stated in subsection (2), Urban Utilities may elect to:
 - (a) accept the request; or
 - (b) not accept the request and give a notice of actions required to the person making the request within five business days after the request is received.
- (4) If Urban Utilities does not give a notice stated in subsection (3) to the applicant within five business days after the request is received and the required fee has been paid, the request is taken to have been accepted in full.
- (5) If the applicant does not comply with the notice stated in subsection (3)(b) within ten business days after the notice is given, and Urban Utilities has not otherwise elected to accept the request, the request is taken to have not been made, and the request will be cancelled.

SC2.4.2 Issuing the services advice notice

- (1) If the request complies with the criteria stated in Section SC2.4.1, Urban Utilities may issue the services advice notice.
- (2) Urban Utilities must give the services advice notice to the person making the request within 20 business days after the later of the following:
 - (a) the day the request was accepted in full; or
 - (b) another period agreed between Urban Utilities and the person making the request.

Editor's note: If Urban Utilities does not have sufficient information to assess the request, a otice requesting information may be given and an agreed timeframe for responding to the request will be negotiated.

SC2.5 Request for a standard connection

The purpose of SC2.5 is to state the way to request a standard connection in accordance with the *SEQ Water Act.*

Editor's note: for further standard connection process guidance please refer to the online Standard <i>Connection Guidelines.

SC2.5.1 Lodging a request for a standard connection

- (1) Where the connection complies with all of the criteria relevant to the standard connection stated in Table SC2.2.1, a person may, by notice, ask Urban Utilities for approval for a standard connection.
- (2) The request:
 - (a) if Urban Utilities has a digital or hard copy form for the application, must be in that form;
 - (b) if the land related to the standard connection is other than a publicly controlled place and the person making the request is not the owner of the land, must be accompanied by the land owner's written consent; and
 - (c) must be accompanied by the required fee.
- (3) Where the request does not comply with the criteria stated in subsection (2), Urban Utilities may elect to:
 - (a) accept the request; or
 - (b) not accept the request and give notice of actions required to the person making the request within five business days after the request is received.
- (4) If Urban Utilities does not give a notice stated in subsection (3) to the person making the request within five business days after the request is received and the required fee has been paid, the request is taken to have been properly made.
- (5) If the person making the request does not comply with the notice stated in subsection
 (3)(b) within ten business days after the notice is given, and Urban Utilities has not otherwise elected to accept the request, the request is taken to have not been made and the request will be cancelled.

SC2.5.2 Deciding request

- (1) If the request complies with the criteria stated in Section SC2.5.1, Urban Utilities must grant the request (deciding the application) within five business days from the date the request is properly made or another period as agreed by Urban Utilities and the person making the request.
- (2) Urban Utilities must within five business days of granting the request (deciding the application), issue a decision notice to the person making the request stating:
 - (a) the standard conditions for the standard connection; and
 - (b) the connection charge and property service works charge payable for the standard connection.
- (3) If adopted infrastructure charges apply to the request for a standard connection, Urban Utilities will give the person making the request an infrastructure charges notice within ten business days of granting the request.

SC2.6 Application for a water approval

- (1) The purpose of SC2.6 is to state the way to apply for a water approval.
- (2) A water approval is required for each connection, disconnection or alteration to Urban Utilities' drinking water, recycled water or wastewater networks.

SC2.6.1 Lodging an application for a water approval

- (1) A person may, by notice, apply to Urban Utilities for a water approval for a water connection.
- (2) The request:
 - (a) if Urban Utilities has a digital or hard copy form for the application, must be in that form;
 - (b) must be accompanied by the documents as required under Section SC2.6.4; and
 - (c) must be accompanied by the required fee.
- (3) The application must be accompanied by the written consent of the owner of the land related to the connection the subject of the application to the extent the applicant is not the owner, however, this subsection (3) does not apply to the extent the land related to the connection is a publicly controlled place.

Editor's note: The premises subject to the water approval include:

- (1) the land for the connection; and
- (2) the land for which access is required for the connection. For example, the adjoining premises.
- (4) Where the application does not comply with the criteria stated in subsection (2), Urban Utilities may not accept the application and give a notice of actions required to the applicant within five business days after the application is received.
- (5) Where the application does not comply with the criteria stated in subsection (3), Urban Utilities:
 - (a) cannot accept the application; and
 - (b) must give a notice to the applicant within five business days after the application is received, requesting the provision of the owner's consent.
- (6) If Urban Utilities does not give a notice stated in subsections (4) and (5) to the applicant within five business days after the application is received and the required fee has been paid, the application is deemed to have been properly made.
- (7) If the applicant does not comply with the notice stated in subsection (4) and/or (5) within ten business days after the notice is given and Urban Utilities has not otherwise elected to accept the application, the application for a water approval is taken to have not been made and the application will be cancelled.
- (8) Assessment of the application will commence when:
 - (a) the application is deemed to have been properly made in accordance with subsection (6); or
 - (b) Urban Utilities notifies the applicant that the application has been properly made.

SC2.6.2 Assessing application

- (1) The application must be assessed against:
 - (a) the relevant connection criteria in Section SC2.2;
 - (b) the SEQ Code;
 - (c) any other matter Urban Utilities considers to be relevant to the connection or supply of services.
- (2) Where Urban Utilities does not have sufficient information to assess the application for a water approval, Urban Utilities may give an information request to the applicant within 20 business days after the application is properly made.
- (3) Unless a further period is agreed by Urban Utilities, if the applicant does not respond to an information request issued under subsection (2) within 20 business days after the information request is given, the application is taken to have lapsed.

SC2.6.3 Deciding applications

- (1) If the application complies with the criteria stated in Section SC2.6.2, Urban Utilities may decide the application.
- (2) Urban Utilities must give notice of the decision to the applicant within 20 business days after the later of the following:
 - (a) where an information request has not been issued, the day the application was properly made; or
 - (b) where an information request has been issued, the day the applicant has responded to the information request; or
 - (c) another period agreed between Urban Utilities and the applicant.

SC2.6.4 Documents required to lodge an application for a water approval

- (1) This section applies to an application for a water approval.
- (2) The application must be accompanied by supporting information and plans of the premises where the works is to be carried out showing:
 - (a) details of the type, scale, location, timing or intensity of all existing and proposed development; and
 - (b) where involving reconfiguring a lot, the location of and layout for all existing and proposed lots on the premises; and
 - (c) the location and floor plan of all existing and proposed building or structure on the premises; and
 - (d) the proposed layout of water and wastewater service infrastructure for the site, including:
 - location of water mains, pump stations (including boosters), storage facilities (reservoirs), location of key fittings (e.g. tees, stop valves, hydrants) or special fittings (e.g. scours, pressure reducing valves, flowmeters);
 - (ii) location of sewage pump stations (including emergency storage, overflow structures and odour management), rising mains (and associated fittings), discharge maintenance holes, gravity mains (and maintenance holes), and any infrastructure item which receives flow from an upstream infrastructure item;

- (iii) sewage treatment plants, including outfall structures and disposal systems;
- (iv) the location and approximate dimensions of each connection point to Urban Utilities' water service or wastewater service;
- (v) demonstrated safe access and egress arrangements for vehicles and pedestrians; and
- (e) where carrying out a connection to a network other than a drinking water or wastewater network, evidence of an allocation from or entitlement to Urban Utilities' non-drinking water or recycled water.
- (3) For subsection (2), a plan must be drawn to scale and show enough detail to allow Urban Utilities to assess the proposed water or wastewater infrastructure work.
- (4) In this section, relevant details of the person who designed the connection means:
 - (a) the person's name; and
 - (b) if the person is licensed or registered under a law of the State to practise in the aspect relevant to the work, the person's licence number or registration number; and
 - (c) if the work relates to a wastewater treatment plant and subsection (b) does not apply, enough information about the person's qualifications and experience to allow Urban Utilities to decide whether the person is qualified to design the facility.

SC2.7 Request to change a water approval condition

The purpose of SC2.7 is to state the way to request to change a water approval condition.

Editor's note: A request to change a water approval condition includes any request to extend the currency period of a water approval.

SC2.7.1 Lodging a request to change a water approval condition

- (1) A person may, by notice, ask Urban Utilities to change a water approval condition.
- (2) The request:
 - (a) if Urban Utilities has a digital or hard copy form for the application, must be in that form;
 - (b) must be accompanied by the documents as required under Section SC2.6.4 relevant to the request to change a water approval condition; and
 - (c) must be accompanied by the required fee.
- (3) The request must be accompanied by the written consent of the owner of the land related to the connection the subject of the water approval to the extent the applicant is not the owner, however, this subsection (3) does not apply to the extent the request relates to a publicly controlled place.
- (4) Where the request does not comply with the criteria stated in subsection (2), Urban Utilities may not accept the request and may give a notice of actions required to the person making the request within five business days after the request is received.
- (5) Where the request does not comply with the criteria stated in subsection (3), Urban Utilities:
 - (a) cannot accept the request; and
 - (b) must give a notice to the person making the request within five business days after the request is received, requesting for the provision of the owner's consent.
- (6) If Urban Utilities does not give a notice stated in subsection (4) and (5) within five business days after the request is received and the required fee has been paid, the request is taken to have been accepted in full.
- (7) If the applicant does not comply with the notice stated in subsections (4) and/or (5) within ten business days after the notice is given and Urban Utilities has not otherwise elected to accept the request, the request to amend a water approval condition is taken to have not been made, and the request will be cancelled.
- (8) If the request relates to a connection that is approved under a water approval, the request may be made only if the water approval has not lapsed.

SC2.7.2 Assessing request

- (1) The request must be assessed against the following criteria:
 - (a) the change must be a minor change to the water approval condition;
 - (b) the relevant criteria stated in SC2.2;
 - (c) the SEQ Code; and
 - (d) any other matter Urban Utilities considers to be relevant to the connection or supply of services.

Editor's note: If Urban Utilities does not have sufficient information to assess the request, a notice requesting information may be given an agreed timeframe to respond to the request will be negotiated.

SC2.7.3 Deciding request

- (1) If the request complies with the criteria for the request stated in Section SC2.7.2, Urban Utilities must approve the request.
- (2) Urban Utilities must give notice of the decision to the person making the request within 20 business days after the later of the following:
 - (a) the day the request was accepted in full; or
 - (b) another period agreed between Urban Utilities and the person making the request.

SC2.8 Request for a connection certificate

The purpose of SC2.8 is to state the way to apply for a request for a connection certificate.

SC2.8.1 Lodging a request for a connection certificate

- (1) A person may, by notice, ask Urban Utilities to issue a connection certificate for a connection.
- (2) The request:
 - (a) if Urban Utilities has a form for the request, must be in that form; and
 - (b) must be accompanied by the required fee.
- (3) If the request relates to a connection that is approved under a water approval, the request may be made only if the water approval has not lapsed.
- (4) If a condition of a water approval requires a request for a connection certificate to be given to Urban Utilities, the request must be made:
 - (a) if the water approval states a time by which the request must be made, on or before the stated time; or
 - (b) within four years after the water approval takes effect; or
 - (c) a longer period agreed between Urban Utilities and the applicant.

SC2.8.2 Assessing request

- If the request relates to a connection certificate for a connection that is approved under a water approval, or a connection certificate required under a condition of a water approval, the request must be assessed against the following criteria:
 - (a) for a connection:
 - (i) the conditions of the water approval have been complied with; or
 - (ii) the applicant has given security to Urban Utilities to ensure compliance with the conditions;
 - (b) there are no outstanding fees or charges levied by Urban Utilities under the SEQ Water Act.
- (2) Security may only be provided for uncompleted works where:
 - (a) all bonded works can be completed within:
 - (i) three months of the issuing of the connection certificate; or
 - (ii) another period approved by Urban Utilities; and
 - (b) the total value of all uncompleted works does not exceed 50% of the total value of all works to be completed under:
 - (i) the water approval; or
 - (ii) conditions relevant to the particular stage of the works; or
 - (iii) such other percentage required by an infrastructure agreement; and
 - (c) there is no breach of existing bond conditions.

Editor's note: for process guidance on bonding of uncompleted works please refer to the online guidelines.

- (3) Urban Utilities will review the request to determine if it is complete and will give an information request within five business days after the request is received.
- (4) If the request is not complete, the notice issued under subsection (3) will state the requirements to make the request complete.
- (5) Urban Utilities will assess the completed request to determine if it is compliant and will give an information request within 20 business days after the request is complete.
- (6) If the request is not compliant, the notice issued under subsection (5) will state the requirements to make the request compliant.
- (7) If the applicant does not respond to the notice in subsection (3) or (5) within 20 business days after the notice is given, the request for a connection certificate is taken not to have been made and penalties may apply in relation to breach of the water approval.

SC2.8.3 Deciding request

- (1) If the request complies with the criteria for the request stated in Section SC2.8.2, Urban Utilities must approve the request.
- (2) Urban Utilities must give notice of the decision to the person making the application within 20 business days after the later of the following:
 - (a) where an information request has not been issued, the day the application was received; or
 - (b) where an information request has been issued, the day the person making the request has responded to the information request; or
 - (c) another period agreed between Urban Utilities and the person making the request.

SC2.9 Cancelling a water approval

(1) A request in writing may be made to Urban Utilities to cancel a water approval (after it takes effect), provided the connection works under the water approval have not commenced.

Editor's note: Connection works have not commenced means either:

- (i) Urban Utilities' endorsed consultant has not commenced the connection works; or
- (ii) there is no Network Access Permit being issued.
- (2) The request must be accompanied by:
 - (a) the required fee; and
 - (b) the written consent of:
 - (i) if the applicant is not the owner of the premises the owner of the premises; and
 - (ii) if there is an agreement for a person to buy the premises from the owner of the premises the other person.
- (3) On receiving a request that complies with this section, Urban Utilities will:
 - (a) cancel the water approval; and
 - (b) give notice of the cancellation to:
 - (i) the applicant; and
 - (ii) for a water approval given under an order of the P&E Court—the court.

SC2.10 Statutory delegations

The SEQ Water Act identifies referral agencies for certain aspects of development. Urban Utilities has not delegated any of its decision functions under Section 53 of the SEQ Water Act.

SCHEDULE 3 CHARGES SCHEDULE

SC3.1 Purpose and content

- (1) The charges schedule states Urban Utilities' charges for its water service and wastewater service.
- (2) The charges schedule includes:
 - (a) charges for a customer's use of the services; and
 - (b) charges for an application or request under Chapter 4C of the *SEQ Water Act* including connection charges and works charges.

SC3.2 Service use charges

(1) Residential and non-residential drinking water and wastewater service use charges in each shareholder council local government area can be viewed at **Service Use Charges.**

SC3.3 Charges for an application or request under Chapter 4C of the SEQ Water Act including connection charges and works charges

(1) The charges for an application or request under Chapter 4C of the *SEQ Water Act* including charges for a services advice notice, an application, a request, connection charges and works charges, are contained in the **Developer Customer Price List**.

SCHEDULE 4 INFRASTRUCTURE CHARGES SCHEDULE

SC4.1 Purpose

- (1) The infrastructure charges schedule states:
 - (a) the adopted charge for providing Urban Utilities' trunk infrastructure networks, including:
 - (i) when the charges take effect;
 - (ii) where the charges apply;
 - (iii) statutory increases;
 - (iv) the charges breakup arrangements with each shareholder Council;
 - (b) the method for calculating levied infrastructure charges for additional demand on Urban Utilities' trunk infrastructure networks, including:
 - (i) the application of the levied infrastructure charge;
 - (ii) working out the levied infrastructure charge;
 - (iii) working out the additional demand;
 - (iv) working out the discount;
 - (v) working out the automatic increase;
 - (c) the matters relevant to the working out of an offset and refund for a trunk infrastructure contribution to Urban Utilities' trunk infrastructure networks, including:
 - (i) the criteria that must be met before infrastructure is converted to trunk infrastructure;
 - (ii) the calculation of the establishment cost;
 - (iii) the recalculation of the establishment cost for work and land; and
 - (iv) the timing of an offset and refund.

SC4.2 Adopted infrastructure charges

SC4.2.1 Adopted infrastructure charges for shareholder Councils of Brisbane City, Lockyer Valley, Scenic Rim and Somerset

- (1) The adopted charges for providing Urban Utilities' trunk infrastructure networks for the relevant part of Urban Utilities' geographic area under the *SEQ Water Act*, other than the Ipswich City Council local government area and the Bromelton SDA charge area, are stated in Tables SC4.2.1.1, SC4.2.1.2, and SC4.2.1.3.
- (2) The adopted charges for providing Urban Utilities' trunk infrastructure networks for the Bromelton SDA charge area are stated in Table SC4.2.1.4.

SC4.2.2 Adopted infrastructure charges with shareholder Council of Ipswich City

- (1) Urban Utilities has, for the purposes of working out under the schedule the adopted charge for Urban Utilities' trunk infrastructure networks for the Ipswich City Council local government area, determined the following:
 - (a) a charge for each trunk infrastructure network based on Planning Scheme Policy 5-Infrastructure as in force on 30 June 2011 (including indexation) for development which is included in Tables SC4.2.2.1, SC4.2.2.2, SC4.2.2.3 and SC4.2.2.4 that comprises the following;
 - (i) Urban Utilities' trunk infrastructure network charge (UUNC);
 - (ii) Ipswich City Council's trunk infrastructure network charge (ICCNC);
 - (b) a total trunk infrastructure networks charge (Total NC) for Urban Utilities' trunk infrastructure networks and Ipswich City Council's trunk infrastructure networks which is calculated by adding the UUNC and the ICCNC;
 - (c) the maximum adopted charge (MAC) under the Planning Regulation will be applied by Urban Utilities as follows:
 - (i) for a reconfiguring a lot which is in the residential area or other area not in the commercial or industrial area, the amount of the MAC for a dwelling house (3 or more bedroom) in the Residential charge category in the Planning Regulation;
 - (ii) for a reconfiguring a lot which is in the commercial or industrial area, the percentage of the site area in Table 4.2.2B of the amount of the MAC for the proposed use of the premises in the applicable charge category under the Planning Regulation;
 - (iii) for a material change of use, the amount of the MAC for the proposed use of the premises in the applicable charge category under the Planning Regulation;
 - (d) for the purposes of (c):
 - (i) commercial or industrial area means that part of the Ipswich City Council local government area in the zones and designations under the Ipswich Planning Scheme 2006 identified as the commercial or industrial area in Tables SC4.2.2.3 and SC4.2.2.4;
 - (ii) residential area means that part of the Ipswich City Council local government area in the residential zones and designations under the Ipswich Planning Scheme 2006;
 - (e) the adopted charge for Urban Utilities' trunk infrastructure networks will be calculated by Urban Utilities as follows:
 - (i) where Total NC is less than or equal to the MAC, the UUNC;
 - (ii) where Total NC is greater than the MAC, using the following calculation:

$$\left(\frac{\text{UUNC}}{\text{Total NC}}\right) \times \text{MAC}$$

Column 2 - Sewage trunk infrastructure network charge (\$ per demand unit)

Non-residential use under the Planning Regulation. Editor's note – See Schedule 16, Table 1, column 1 of the Planning Regulation

SC4.2.3 When the adopted infrastructure charges take effect

- (1) The date the adopted charges in the infrastructure charges schedule takes effect is the later of the following:
 - (i) the date stated by the Board of Urban Utilities in a resolution to adopt this infrastructure charges schedule; or
 - (ii) the day the schedule is uploaded to Urban Utilities' website.

SC4.2.4 Where the adopted infrastructure charges apply

(1) The applicable area for the adopted infrastructure charges is all of Urban Utilities' geographic area.

SC4.2.5 Statutory increases

(1) The adopted infrastructure charges set out in this infrastructure charges schedule are applicable at the time this schedule takes effect but are subject to the percentage increase prescribed by Section 112 of the *Planning Act*.

SC4.2.6 Breakup arrangements with shareholder Councils

(1) The adopted infrastructure charges in Tables SC4.2.1.1, SC4.2.1.2 and SC4.2.1.3 together with any statutory increase of adopted charges are subject to the breakup arrangements with the shareholder Councils of Brisbane, Lockyer Valley, Scenic Rim and Somerset as set out in Table SC4.2.6.1 to Table SC4.2.6.4.

Table SC4.2.6.4 Breakup arrangement with Somerset

(2) The adopted infrastructure charges in Table SC4.2.2A to Table SC4.2.2.4 together with any statutory increase of adopted charges are subject to the breakup arrangements set out in Section 52(2) of the Planning Regulation.

SC4.3 Method for calculating levied infrastructure charges

SC4.3.1 Application of the levied infrastructure charge

- (1) A levied infrastructure charge applies for the additional demand placed upon Urban Utilities' trunk infrastructure networks generated by a connection the subject of a water approval.
- (2) A levied infrastructure charge does not apply for the following:
 - (a) a connection the subject of a water approval in the following:
 - (i) a priority development area under the *Economic Development Act 2012*;
 - (ii) the corporation area under the *South Bank Corporation Act 1989*;
 - (iii) core port land under the Transport Infrastructure Act 1994;
 - (iv) an airport site under the Airports Act 1996;
 - (v) designated land under the *Planning Act*, where the connection the subject of the water approval is being carried out by a public sector entity;
 - (b) work or use of land authorised under the *Mineral Resources Act 1989*, the *Petroleum Act 1923*, the *Petroleum and Gas (Production and Safety) Act 2004* or the *Greenhouse Gas Storage Act 2009*.

SC4.3.2 Working out the levied infrastructure charge

(1) The levied charge for the connection the subject of the water approval will be calculated by Urban Utilities as follows:

Levied charge = adopted charge x additional demand – discount

Where the:

adopted charge is determined by identifying the use in respect of the water approval application that is made and the applicable local government in sections SC4.2.1 and SC4.2.2;

additional demand is placed upon Urban Utilities' trunk infrastructure networks calculated in accordance with Section SC4.3.3; and

discount is the credit for the prescribed financial contribution calculated in accordance with Section SC4.3.4.

SC4.3.3 Working out the additional demand

(1) The additional demand for the connection the subject of the water approval will be calculated by Urban Utilities as follows:

Additional demand = connection demand – demand credit

Where the:

connection demand is the demand that will be placed upon Urban Utilities' trunk infrastructure networks by the connection; and

demand credit is the existing demand already placed upon Urban Utilities' trunk infrastructure networks, if applicable.

(2) The connection demand will be calculated using the relevant unit of calculation for an adopted charge for the connection in sections SC4.2.1 and SC4.2.2.

- (3) The demand credit for existing demand will be calculated using the following:
 - (a) for an existing water approval for the premises the existing demand for the wastewater service or water service as applicable;
 - (b) for demand on trunk infrastructure generated by development, the greater of the following:
 - existing lawful use if the premises is subject to an existing use which is lawful and already taking place on the premises that places demand upon Urban Utilities' trunk infrastructure networks – the demand generated for the existing lawful use using the applicable demand units for the use;
 - (ii) previous lawful use if the premises is subject to a previous use which was lawful at the time it was carried out and is no longer taking place on the premises that placed demand upon Urban Utilities' trunk infrastructure networks – the demand generated for the previous lawful use using the applicable demand units for the use;
 - (iii) other development if the premises is subject to other development that may be lawfully carried out without the need for a further development permit under the *Planning Act* that places demand upon Urban Utilities' trunk infrastructure networks the demand generated by the other development using the applicable demand units for the development.
- (4) A demand credit under subsection (3) does not apply if an infrastructure requirement that applies or applied to the water approval, use or development has not been complied with.
- (5) The demand credit for an existing lawful use, previous lawful use or other development under subsection 3(b) will be calculated under subsection 3(b) by Urban Utilities prior to the time for the giving of the water approval to which the levied charge applies as follows:
 - (a) an applicant which is seeking the demand credit for an existing lawful use, previous lawful use or other development must:
 - (i) give a notice Urban Utilities which provides evidence of the existing lawful use, previous lawful use or other development and the calculation of the demand credit; and
 - (ii) pay the prescribed fee;
 - (b) Urban Utilities will:
 - (i) determine if a demand credit for the existing lawful use, previous lawful use or other development is applicable;
 - (ii) calculate the demand credit for the existing lawful use, previous lawful use or other development if applicable;
 - (iii) allocate the demand credit to the part of the premises where the existing lawful use or previous lawful use physically is taking place or took place; and
 - (iv) give a notice to the applicant stating the outcome of Urban Utilities' determination.
- (6) A demand credit is only to be provided to a maximum amount equal to the demand that will be generated by the connection.
SC4.3.4 Working out the prescribed financial contribution, if applicable

- (1) An applicant may apply for a discount in relation to a prescribed financial contribution if all of the following are satisfied in relation to that prescribed financial contribution:
 - (a) it was a financial contribution payable towards the cost of supplying trunk infrastructure under a condition of a development approval given by a shareholder Council before 1 July 2011 under the repealed Integrated Planning Act 1997 or Sustainable Planning Act 2009 and which has not lapsed; and
 - (b) it was paid to the shareholder Council or otherwise satisfied under an infrastructure agreement between the applicant for the development approval and the shareholder Council for the provision of land, work or money for Urban Utilities' trunk infrastructure networks; and
 - (c) it has not been previously reimbursed or otherwise applied against another financial contribution; and
 - (d) the demand placed upon Urban Utilities' trunk infrastructure networks for which it was paid has not been taken up by the existing lawful use or previous lawful use for which the financial contribution was paid.
- (2) The amount of the discount for the prescribed financial contribution will be calculated by Urban Utilities as follows:

Discount = prescribed financial contribution – (adopted charge x demand credit)

Where the:

discount cannot be less than zero;

prescribed financial contribution is calculated in accordance with SC4.3.4(1);

adopted charge is determined by identifying the use in respect of which the water approval application is made and the applicable local government on the table in sections SC4.2.1 and SC4.2.2; and

demand credit is the existing demand already placed upon Urban Utilities trunk infrastructure networks, if applicable

- (3) The discount for the prescribed financial contribution will be calculated by Urban Utilities prior to the time for the giving of the water approval to which the levied charge applies as follows:
 - (a) an applicant which is seeking the discount for the prescribed financial contribution must:
 - (i) give a notice in the prescribed form to Urban Utilities, which provides evidence of the prescribed financial contribution and the calculation of the discount; and
 - (ii) pay the prescribed fee;
 - (b) Urban Utilities will:
 - (i) determine if a discount for a prescribed financial contribution is applicable;
 - (ii) calculate the discount for the prescribed financial contribution if applicable; and
 - (iii) give a notice to the applicant stating the outcome of Urban Utilities' determination.
- (4) The discount for the prescribed financial contribution only applies to and remains with the land that is the subject of the relevant water approval. Therefore, the discount is:
 - (a) capped at the current amount of the applicable adopted charge for the water approval; and
 - (b) not transferable to other land.

SC4.3.5 Working out the automatic increase

- (1) Subject to the *SEQ Water Act*, automatic increases apply to levied charges from when they are levied to when they are paid.
- (2) Where applicable, automatic increases are calculated in accordance with the SEQ Water Act.
- (3) However, the amount of the automatic increase of the levied charge must not be more than the amount of the increase prescribed by the *SEQ Water Act*.

SC4.4 Offset and refund for trunk infrastructure

SC4.4.1 Purpose

- (1) This section states the following matters relevant to working out an offset or refund for the provision of trunk infrastructure for Urban Utilities' trunk infrastructure networks for a connection the subject of a water approval:
 - (a) conversion criteria the criteria for trunk infrastructure to be applied by Urban Utilities in deciding if development infrastructure is trunk infrastructure;
 - (b) establishment cost the method to be applied by Urban Utilities for working out the establishment cost of trunk infrastructure for an offset or refund where an applicant is required under a condition of a water approval to provide land or work for the following trunk infrastructure for Urban Utilities' trunk infrastructure networks:
 - (i) identified trunk infrastructure development infrastructure which is identified in the schedule of works;
 - (ii) different trunk infrastructure development infrastructure which:
 - (A) is an alternative to the identified trunk infrastructure; and
 - (B) delivers the same desired standards of service for the network of development infrastructure stated in the schedule of works;
 - (iii) other necessary trunk infrastructure –development infrastructure which is not identified trunk infrastructure or different trunk infrastructure that satisfies the identified trunk infrastructure criteria and is necessary to service development;
 - (iv) prescribed trunk infrastructure development infrastructure which is not identified trunk infrastructure, different trunk infrastructure or necessary trunk infrastructure that becomes trunk infrastructure under the SEQ Water Act;
 - (c) whether an offset or refund applies and if so the details of the offset and refund and the timing of the offset and refund.

SC4.4.2 Conversion application

SC4.4.2.1 Purpose

- (1) The purpose of this section is to state the:
 - (a) way to make a conversion application; and
 - (b) the criteria for assessing a conversion application.

SC4.4.2.2 Conversion Application criteria and lodgement

- (1) A person may, by notice, apply to Urban Utilities to convert non-trunk infrastructure to trunk infrastructure.
- (2) The application:
 - (a) if Urban Utilities has a form for the application, must be in that form; and
 - (b) state how the non-trunk infrastructure meets each of the conversion criteria; and
 - (c) must be accompanied by the required fee; and
 - (d) must be made within 1 year after the water approval takes effect.
- (3) Where the application does not comply with the criteria stated in subsection (2), Urban Utilities may elect to:
 - (a) accept the application; or

- (b) not accept the application and give a notice of actions required to the applicant within five business days after it is received.
- (4) If Urban Utilities does not give a notice stated in subsection (3) to the applicant within five business days after the application is received, and the required fee has been paid, the application is deemed to have been properly made.
- (5) If the applicant does not comply with a notice stated in subsection (3) within 10 business days after the application is given and Urban Utilities has not otherwise elected to accept the application, the conversion application is taken to have not been made, and the application will be cancelled.

SC4.4.2.3 Assessing application

- (1) The application must be assessed against the following conversion criteria:
 - (a) construction of the infrastructure has not commenced; and
 - (b) the infrastructure is owned or will be owned by Urban Utilities; and
 - (c) the infrastructure is consistent with desired standards of service; and
 - (d) the infrastructure will service, or is planned to service;
 - (i) premises other than the subject premises; and
 - (ii) land not affected by a developable area constraint; and
 - (iii) development consistent with the assumptions about the type, scale, location and timing of future development; and
 - (iv) premises completely inside the connection area or future connection area; and
 - (e) the type, size and function of the infrastructure is consistent with the types of trunk infrastructure stated in Schedule 5; and
 - (f) the infrastructure is inconsistent with the requirements for non-trunk infrastructure stated in Section 99BRDJ of the *SEQ Water Act*; and
 - (g) the condition of the water approval relating to the infrastructure was not imposed to relocate, modify or otherwise alter existing trunk infrastructure in a way that does not increase the capacity of the existing trunk infrastructure; and
 - (h) the type, size and location of the infrastructure are the most cost-effective option for servicing multiple developments in the area.

Editor's note: The most cost-effective option for trunk infrastructure provision means the least cost option based upon the life cycle cost of the infrastructure required to service unconstrained land at the desired standard of service.

SC4.4.2.4 Deciding application

- (1) If the application complies with the criteria for the application stated in Section SC4.4.2.3, Urban Utilities must approve the application.
- (2) Prior to making a decision, Urban Utilities may give a notice to the applicant requesting for additional information Urban Utilities reasonably needs to make the decision, and stating the timeframe for the applicant to provide the additional information.
- (3) If the applicant does not comply with the notice stated in subsection (2) within the timeframe requested by Urban Utilities, or a further period agreed by Urban Utilities, the application will lapse.

- (4) Urban Utilities must give notice of the decision to the applicant within 30 business days after the later of the following:
 - (a) where an information request has not been issued the day the application was received;
 - (b) where an information request has been issued the day the applicant responds to an information request; or
 - (c) another period agreed between Urban Utilities and the applicant.

SC4.4.3 Request to recalculate the establishment cost

SC4.4.3.1 Purpose

- (1) The purpose of this section is to state the:
 - (a) way to request the establishment cost for trunk infrastructure be recalculated; and
 - (b) methodology used to recalculate the establishment cost for trunk infrastructure.

SC4.4.3.2 Lodging a request to recalculate the establishment cost

- (1) Prior to the commencement of construction, a person may, by notice to Urban Utilities, request Urban Utilities to recalculate the establishment cost stated in an infrastructure charges notice.
- (2) The request:
 - (a) if Urban Utilities has a form for the request, must be in that form;
 - (b) must be accompanied by the relevant documents required under Section SC4.4.3.10;
 - (c) in respect of a request to recalculate the establishment cost of work, is made before construction of the infrastructure has commenced and
 - (d) must be accompanied by the required fee.
- (3) Where the request does not comply with the criteria stated in subsection (2), Urban Utilities may elect to:
 - (a) accept the request; or
 - (b) reject the request and give a notice of grounds including but not limited to the criteria that have not been complied with; or
 - (c) not accept the request and give a notice of action required to the applicant within five business days after it is received.
- (4) If Urban Utilities does not give a notice stated in subsection (3) to the person making the request within five business days after the request is received, and the required fee is paid, the request is taken to have beenaccepted in full.
- (5) If the person making the request does not comply with a notice stated in subsection (3) within ten business days after the request is given and Urban Utilities has not otherwise elected to accept the request, the request to recalculate the establishment cost is taken to have not been made and the request will be cancelled.
- (6) The request must be made:
 - (a) only if the water approval has not lapsed; and
 - (b) before the charge under the infrastructure charges notice becomes payable under *SEQ Water Act*.

SC4.4.3.3 Methodology to recalculate the establishment cost for work

- (1) The establishment cost must be recalculated on the basis of the market cost using the following methodology.
- (2) The market cost of establishment cost is calculated by:
 - (a) including the following:
 - (i) the construction cost for the work;
 - (ii) construction on costs for the work which does not exceed the following maximum construction on costs:
 - A. the cost of survey for the work which does not exceed 2% of the construction cost for the work for the cost of that part of the work in a construction contract which is subject to survey;
 - B. the cost of geotechnical investigations for the work which do not exceed 1% of the construction cost for the work for the cost of that part of the work in a construction contract which is subject to geotechnical investigations;
 - C. the cost of only detailed design for the work which do not exceed 6% of the construction cost for the work for the cost of that part of the work in a construction contract which is subject to detailed design;
 - D. the cost of project management and contract administration for the work which do not exceed 4% of the construction cost for the work for the cost of that part of the work in a construction contract which is subject to project management and contract administration;
 - E. the cost of environmental investigations for the work which do not exceed 1% of the construction cost for the work for the cost of that part of the work in a construction contract which is subject to environmental investigations;
 - F. a portable long service leave payment for a construction contract for the work;
 - (iii) risk and contingencies that do not exceed 10% of the construction cost for the work for the cost of that part of the work in a construction contract subject to a contingency.
 - (b) excluding the following:
 - (i) the planning of the work;
 - (ii) a cost of carrying out temporary infrastructure;
 - (iii) a cost of carrying out other infrastructure which is not part of the trunk infrastructure contribution;
 - (iv) a cost of the decommissioning, removal and rehabilitation of infrastructure identified in subsections (b)(ii) and (b)(iii);
 - (v) a part of the trunk infrastructure contribution provided by:
 - A. Urban Utilities; or
 - B. a person, other than the applicant or a person engaged by the applicant;
 - (vi) a cost to the extent that GST is payable, and an input tax credit can be claimed for the work;
 - (vii) a cost attributable directly or indirectly to the failure of an applicant or a person engaged by the applicant to perform and fulfil a relevant approval for the work;*Editor's note: A relevant approval is a development approval under the Planning Act.*
 - (viii) a cost caused or contributed to by a negligent or wilful act or omission by the applicant or a person engaged by the applicant

- (ix) a cost of carrying out development infrastructure that is only made necessary by the development and does not contribute to the function of the trunk infrastructure item;
- (x) a cost of carrying out trunk infrastructure which relates to another development infrastructure network;
- (xi) a cost of carrying out development infrastructure which is replacing existing infrastructure with different infrastructure in another development infrastructure network;
- (xii) a cost of carrying out development infrastructure in excess of the desired standard of service for the network of development infrastructure;
- (xiii) a cost of existing development infrastructure that services or is planned to service existing or future demand that is replaced by the trunk infrastructure contribution.
- (3) Where Urban Utilities does not have sufficient information to recalculate the establishment cost, Urban Utilities may give an information request to the person making the request within 20 business days after the request was accepted in full.
- (4) If the person making the request does not respond to an information request within 20 business days after the information request is given, or a further period agreed by Urban Utilities, the request lapses.

SC4.4.3.4 Methodology to recalculate the establishment cost for land

- (1) The establishment cost for a trunk infrastructure that is land must be recalculated on the basis of current market value using the following methodology.
- (2) The current market value of the land is the difference, determined by using the before and after method of valuation of the whole of the subject premises, between:
 - (a) the current market value of the subject premises including the land; and
 - (b) the current market value of the subject premises excluding the land.
- (3) The calculation of current market value will be based on a valuation of the land undertaken by a valuer registered with the Valuers Registration Board.
- (4) Where Urban Utilities does not have sufficient information to recalculate the establishment cost, Urban Utilities may give an information request to the person making the request within 20 business days after the request was accepted in full.
- (5) If the person making the request does not respond to an information request within 20 business days after the information request is given, or a further period agreed upon by Urban Utilities, the request lapses.

SC4.4.3.5 Deciding request to recalculate the establishment cost

- (1) If the request complies with the criteria stated in Section SC4.4.3.3 or SC4.4.3.4, Urban Utilities must:
 - (a) give to the person making the request a notice which states the following:
 - (i) Urban Utilities' calculation of the market cost for the work and the reason for any difference from the person making the request's calculation; and
 - (ii) the recalculated establishment cost for the work; or
 - (iii) Urban Utilities' calculation of the market value for the land and the reason for any difference from the person making the request's calculation; and
 - (iv) the recalculated establishment cost for the land; and
 - (b) issue an amended infrastructure charges notice.

- (2) Urban Utilities must give notice under subsection (1) to the person making the request within 20 business days after the later of the following:
 - (a) where an information request has not been issued, the day the request was accepted in full; or
 - (b) where an information request has been issued, the day the person making the request has responded to the information request; or
 - (c) another period agreed between Urban Utilities and the person making the request.

SC4.4.3.6 Request to adjust the establishment cost for work

- (1) The person may, by notice to Urban Utilities, request Urban Utilities to adjust the establishment cost for work stated in an infrastructure charges notice, where:
 - (a) an amended infrastructure charges notice has been issued under Section SC4.4.3.5;
 - (b) the cost of the work and additional work will be more than the establishment cost stated in the amended infrastructure charges notice.
- (2) The request:
 - (a) if Urban Utilities has a form for the request, must be in that form;
 - (b) except in the case of emergency, must be made before any action is taken to interfere, disturb or deal with the claimed latent condition and be accompanied by the relevant documents as required under Section SC4.4.3.10; and
 - (c) must be accompanied by the required fee.
- (3) Where the request does not comply with the criteria stated in subsection (2), Urban Utilities may:
 - (a) reject the request and give a notice of grounds including but not limited to the criteria that have not been complied with; or
 - (b) not accept the request and give notice of actions required to the applicant within five business days after it is received.
- (4) If Urban Utilities does not give a notice stated in subsection (3) to the person making the request within five business days after the request is received, the request is taken to have been accepted in full.
- (5) If the person making the request does not comply with the notice stated in subsection (3) within ten business days after the notice is given and Urban Utilities has not otherwise elected to accept the request, the request to adjust the establishment cost is taken to have not been made and the request will be cancelled.
- (6) In addition to the requirements of subsection (2), the request can only be made:
 - (a) if the water approval has not lapsed; and
 - (b) before the levied charge under the infrastructure charges notice becomes payable under Section 99BRCL of the *SEQ Water Act*.

SC4.4.3.7 Methodology to adjust the establishment cost for work

- (1) The establishment cost must be adjusted using the methodology to recalculate the establishment cost stated in Section SC4.4.3.3.
- (2) Where Urban Utilities does not have sufficient information to adjust the establishment cost, Urban Utilities may give an information request to the person making the request within 20 business days after the request was accepted in full.
- (3) If the applicant does not respond to the information request within 20 business days after the information request is given or a further period agreed by Urban Utilities, the request to adjust the establishment cost lapses.

SC4.4.3.8 Deciding request to adjust the establishment cost for work

- (1) If the request complies with the criteria stated in Section SC4.4.3.6(1), Urban Utilities must:
 - (a) give to the person making the request a notice which states the following:
 - (i) Urban Utilities' calculation of the adjusted market cost for the work and the reason for any difference from the person making the request's calculation;
 - (ii) the adjusted establishment cost for the work; and
 - (b) issue an amended infrastructure charges notice.
- (2) Urban Utilities must give notice under subsection (1) to the person making the request within 20 business days after the later of the following:
 - (a) where there is no information request issued, the day the request was received; or
 - (b) where an information request has been issued, the day the person making the request has responded to an information request; or
 - (c) another period agreed between Urban Utilities and the person making the request.

SC4.4.3.9 Dispute Process

- (1) A person, within ten business days of the date of a notice under subsection SC4.4.3.5(1) or SC4.4.3.8(1):
 - (a) may give Urban Utilities a notice in the prescribed form stating that it disputes the Urban Utilities' recalculation or adjustment of the establishment cost for the work; and
 - (b) must pay the prescribed fee.

Editor's note: The prescribed fee may include the distributor-retailer's costs for the dispute process including the cost of the independent registered quantity surveyor.

- (2) The Urban Utilities and the person will take the following action to resolve the dispute:
 - (a) Urban Utilities will appoint an independent expert agreed to by the person to determine the recalculated or adjusted establishment cost for the work in accordance with this plan;
 - (b) Urban Utilities and the person will cooperate in good faith with the independent expert;
 - (c) Urban Utilities and the person will accept the independent expert's determination of the establishment cost for the work;
 - (d) Urban Utilities will, as soon as reasonably practicable:
 - (i) give to the person a notice that states the recalculated or adjusted establishment cost for the work determined by the independent expert; and
 - (ii) if necessary, issue an amended infrastructure charges notice.

SC4.4.3.10 Documents required for lodgement of a request to recalculate the establishment cost

- (1) This section applies to a request to recalculate the establishment cost.
- (2) Where involving trunk infrastructure that is works, the request must be accompanied by:
 - (a) a detailed schedule of the scope of the work ; and
 - (b) if the work relates to a physical condition or circumstance that the applicant claims is a latent condition, relevant supporting evidence (including a geotechnical report certified by a Registered Professional Engineer Queensland in the case of subsurface conditions) demonstrating that the physical condition or circumstance is a latent condition; and
 - (c) a detailed breakdown of elements of the cost estimate (consistent with the provisions of SC4.4.3.3); and
 - (d) a declaration signed by the applicant stating that an open tender process has been conducted; and
 - (e) the tenders received; and
 - (f) the applicant's preferred tenderer; and
 - (g) the applicant's reason for the preferred tenderer; and
 - (h) the terms of the construction contract for the work; and
 - (i) a plan for each development infrastructure network clearly showing the extent of the work for which an offset is sought; and
 - (j) the applicant's calculation of the market cost for the work.
- (3) Where involving trunk infrastructure that is lands, the request must be accompanied by:
 - (a) a valuation report prepared and certified by a valuer registered with the Valuers Registration Board; and
 - (b) the valuation report must include:
 - (i) supporting information regarding the highest and best use of the land which the valuer has relied on to form an opinion about the value; and
 - (ii) the relevant sales evidence and clear analysis of how those bona fide sales and any other information was relied upon in forming the valuation assessment; and
 - (iii) a plan clearly showing the area of land that is subject to constraints, including for example:
 - A. a restriction under:
 - 1. a law of the State; or
 - 2. a State or local planning instrument under the *Planning Act*; or
 - 3. a relevant Commonwealth Act; and
 - B. a tenure under a law of the State; and
 - C. a lease, licence, permit or permission to occupy; and
 - D. an agreement under a law of the State; and
 - E. a determination of native title or an Indigenous land use agreement under the *Native Title Act 1993* (Cwlth); and
 - (iv) the valuer's calculation of the market cost for the land based on the before and after method of valuation; and
 - (c) for subsection (3)(b)(iv), at the time of the later of the following:
 - (i) where a development permit under the *Planning Act* has been issued, the day prior to the day the development application was properly made; or

- (ii) where a development permit under the *Planning Act* has not been issued, the day prior to the day the application for a water approval was properly made; or
- (iii) another time agreed between Urban Utilities and the person making the request; and
- (d) the relevant details of the person who valued the land on:
 - (i) each page of the report; or
 - (ii) a page at the front of the report that refers to each other page of the report.
- (4) For sections (2) and (3), a plan must be drawn to scale and show enough detail to allow Urban Utilities to decide the request to assess the proposed water or wastewater infrastructure work and the constrained land;
- (5) For subsection (3)(d), relevant details of the person who valued the land means:
 - (a) the person's name; and
 - (b) if the person is licensed or registered under a law of the State to practise in the aspect relevant to the work, the person's licence number or registration number.

SC4.4.4 Application of an offset and refund

- (1) The following apply if a trunk infrastructure contribution services or is planned to service premises other than premises the subject of the water approval and an adopted charge applies to the connection the subject of the water approval:
 - (a) an offset where the establishment cost for the trunk infrastructure contribution is equal to or less than the levied charge; and
 - (b) a refund where the establishment cost for the trunk infrastructure contribution is more than the levied charge.

SC4.4.5 Timing of an offset and refund

- (1) An applicant entitled to an offset or refund for the trunk infrastructure contribution must:
 - (a) give Urban Utilities a notice which states the following:
 - (i) the date the trunk infrastructure contribution the subject of an offset or refund was lawfully completed;
 - (ii) that the trunk infrastructure contribution has been provided in accordance with the relevant water approval for the trunk infrastructure contribution; and
 - (b) pay the required fee.
- (2) Urban Utilities will as soon as reasonably practicable after receiving a notice under subsection (1):
 - (a) determine whether the trunk infrastructure contribution has satisfied the matters in subsection (1)(a); and
 - (b) give the applicant a notice stating the outcome of Urban Utilities' determination.
- (3) Urban Utilities, if satisfied of the matters in subsection (1)(a), will, unless otherwise provided for in an infrastructure agreement:
 - (a) for an offset set off the establishment cost for the trunk infrastructure contribution against the levied charge when the levied charge stated in the infrastructure charges notice is payable under the *SEQ Water Act*;
 - (b) for a refund give the refund when stated in the infrastructure charges notice.
- (4) Urban Utilities has adopted payment triggers in relation to the determination of an infrastructure charges notice of when a refund will be given by Urban Utilities to achieve the following:

- (a) to seek to integrate land use and infrastructure plans;
- (b) to implement this plan as the basis for Urban Utilities' trunk infrastructure funding;
- (c) to implement infrastructure funding which is equitable and financially sustainable to Urban Utilities.
- (5) Urban Utilities' determination of when a refund will be given by Urban Utilities and related matters under an infrastructure charges notice is as follows:
 - (a) for a trunk infrastructure contribution for identified trunk infrastructure or different trunk infrastructure which is provided after the planned period for the trunk infrastructure contribution stated in this plan:
 - (i) the following payment triggers apply:
 - A. for a refund which is an amount that is \$1 million or less—the refund may be given by 30 September of the calendar year following the completion of the trunk infrastructure contribution;
 - B. for a refund which is an amount that is more than \$1 million but not more than \$10 million—the refund may be given annually over three years in equal payments by 30 September in each year commencing in the calendar year following the completion of the trunk infrastructure contribution;
 - C. for a refund which is more than \$10 million—the refund may be given annually over five years in equal payments by 30 September in each year commencing in the calendar year following the completion of the trunk infrastructure contribution;
 - (ii) each amount to be paid under subsection (i) will be increased by the CPI from the date of the infrastructure charges notice for the refund to the date that the amount is paid;
 - (b) for a trunk infrastructure contribution for identified trunk infrastructure or different trunk infrastructure which is provided before or in the planned period for the trunk infrastructure contribution stated in this plan:
 - (i) the following payment triggers apply:
 - A. for a refund which is an amount that is \$1 million or less—the refund may be given by 30 September of the calendar year following the end of the relevant planned date or period for the trunk infrastructure contribution;
 - B. for a refund which is an amount that is more than \$1 million but not more than \$10 million—the refund may be given annually over three years in equal payments by 30 September in each year commencing on the later of the following:
 - 1. the calendar year following the completion of the trunk infrastructure contribution;
 - 2. the calendar year which is two years before the end of the relevant planned date or period for the trunk infrastructure contribution;
 - C. for a refund which is more than \$10 million—the refund may be given annually over five years in equal payments by 30 September in each year commencing on the later of the following:
 - 1. the calendar year following the completion of the trunk infrastructure contribution; or
 - 2. the calendar year which is four years before the end of the relevant planned date or period for the trunk infrastructure contribution;

- (ii) each amount to be paid under subsection (i) will be increased by the CPI from the date of the infrastructure charges notice for the refund to the date that the amount is paid;
- (c) for a trunk infrastructure contribution for necessary trunk infrastructure:
 - Urban Utilities will estimate the period in which the trunk infrastructure contribution would have been planned to be provided had it been included in this plan, having regard to the method to be used by Urban Utilities to calculate the planned date or period of items of identified trunk infrastructure for the network of development infrastructure stated in this plan (specified date or period);
 - (ii) Urban Utilities will, upon the completion of the trunk infrastructure contribution include the trunk infrastructure as existing trunk infrastructure in this plan;
 - (iii) the following payment triggers apply:
 - A. for a refund which is an amount that is \$1 million or less—the refund may be given by 30 September of the calendar year following the end of the specified date or period for the trunk infrastructure contribution;
 - B. for a refund which is an amount that is more than \$1 million but not more than \$10 million—the refund may be given annually over three years in equal payments by 30 September in each year commencing on the later of the following:
 - 1. the calendar year following the completion of the trunk infrastructure contribution;
 - 2. the calendar year which is two years before the end of the specified date or period for the trunk infrastructure contribution;
 - C. for a refund which is more than \$10 million—the refund may be given annually over five years in equal payments by 30 September in each year commencing on the later of the following:
 - 1. the calendar year following the completion of the trunk infrastructure contribution;
 - 2. the calendar year which is four years before the end of the specified date or period for the trunk infrastructure contribution;
 - (iv) each amount to be paid under subsection (iii) will be increased by the CPI from the date of the infrastructure charges notice for the refund to the date that the amount is paid;
- (d) for a trunk infrastructure contribution for prescribed trunk infrastructure:
 - (i) Urban Utilities will, upon the completion of the trunk infrastructure contribution include the trunk infrastructure as existing trunk infrastructure in this plan;
 - (ii) the payment trigger for a refund is 30 September of the calendar year following the end of the planning horizon of the respective Urban Utilities' trunk infrastructure network in this plan;
 - (iii) the amount to be paid under subsection (ii) will be increased by the CPI from the date of the infrastructure charges notice for the refund to the date that the amount is paid.

SCHEDULE 5 TYPES OF TRUNK INFRASTRUCTURE

Table SC5.1 Types of trunk infrastructure

| Infrastructure network | Examples of trunk infrastructure owned or to be owned by Urban Utilities |
|---------------------------|--|
| Drinking water | Land and/or works for: (1) a water treatment facility or chlorination facility, including directly associated telemetry, monitoring and control equipment; or (2) water storage facilities where the ultimate total capacity at the site is greater than or equal to 150 kilolitres including directly associated telemetry, monitoring and control equipment; or |
| | (3) a pump station (including boosters) which is required to deliver an ultimate design demand of greater than or equal to 12 litres per second normal peak demand (excluding fire flow demand), including directly associated telemetry, monitoring and control equipment; or |
| | (4) a water main having a nominal diameter greater than or equal to 200 mm including directly associated fittings being valves, hydrants, scours and air valves; or |
| | (5) a water main which: (a) has a nominal diameter less than 200mm including directly associated fittings being valves, hydrants, scours and air valves; and |
| | (b) is located in a road corridor and performs the same function as another water main in the same road corridor where: |
| | the purpose of the second water main is purely to augment the capacity of the first water main; and |
| | (ii) the combined water mains have an equivalent diameter greater than or equal to 200mm; or |
| | Editor's note: Water mains on different pressure zones, rider mains paralleling large diameter mains, mains on both sides of major roadways, mains on both sides of streets in industrial areas and the like perform a different function to each other. |
| | (6) a pressure reducing valve, including directly associated telemetry, monitoring and control equipment; or |
| | (7) a flow meter that is not directly associated with any other equipment except for a water main including directly associated telemetry equipment; or |
| | (8) a pressure gauge that is not directly associated with any other equipment except for a water main including directly associated telemetry equipment; or |
| | (9) telemetry, monitoring and control equipment associated with multiple water supply infrastructure items such as control room equipment and the radio communications network. |
| Wastewater | Land and/or works for: |
| | a wastewater treatment plant, including outfall structures and disposal systems; or a wastewater pump station which is required to deliver an ultimate design peak wet weather flow of greater than or equal to 9 litres per second including directly associated telemetry, monitoring and control equipment, emergency storage facilities, emergency overflow structures and odour management; or |
| | (3) a rising main associated with a trunk sewage pump station including associated fittings being valves, scours, air valves and discharge maintenance holes; or |
| | (4) a wastewater gravity main which has a nominal diameter greater than or equal to 225mm including directly associated maintenance structures and emergency overflow structures; or |
| | (5) a wastewater gravity main which: |
| | (a) has a nominal diameter less than 225mm including directly associated maintenance structures and emergency overflow structures; and |
| | (b) augments another wastewater gravity main where they share a common upstream maintenance structure which splits the flow and a common downstream maintenance structure which re-joins the flow; or |
| | (6) an infrastructure item which receives flow from an upstream infrastructure item that is trunk infrastructure under subsections (1) to (5) above; or |
| | (7) telemetry, monitoring and control equipment associated with multiple wastewater infrastructure items such as control room equipment and the radio communications network. |

SCHEDULE 6 EXTRINSIC MATERIAL

The below table identifies the documents that assist in the interpretation of this plan and are extrinsic material under the Statutory Instruments Act 1992.

Table SC6.1 Extrinsic material

| Title of document | Date | Author |
|--|--------|------------------------------------|
| Brisbane City Council Local Government Infrastructure Plan | Jun-18 | Brisbane City Council |
| Brisbane City Council Local Government Infrastructure Plan – Extrinsic Material | Oct-17 | Brisbane City Council |
| Brisbane City Council Total Water Cycle Management Plan | 2013 | Brisbane City Council |
| Ipswich Council Local Government Infrastructure Plan | Apr-18 | Ipswich City Council |
| Local Government Infrastructure Plan, Supporting Document, Planning Assumptions Summary Report | 2016 | Ipswich City Council |
| Lockyer Valley Regional Council, Local Government Infrastructure Plan | 2016 | Lockyer Valley Regional Council |
| Lockyer Valley Regional Council, Extrinsic Material to the Local Government Infrastructure Plan | Nov-17 | Lockyer Valley Regional Council |
| Scenic Rim Local Government Infrastructure Plan | Jun-18 | Scenic Rim Regional Council |
| Scenic Rim Regional Council, Planning Assumptions – Extrinsic Material for LGIP | Jan-18 | Scenic Rim Regional Council |

SCHEDULE 7 MAPPING

SC7.1 Maps

Water Netserv Plan Mapping is available on the Urban Utilities website at Water Netserv Plan.

SC7.2 Connection area and future connection area maps (including trunk infrastructure)

SC7.2.1 Drinking water connection area and future connection area maps (including trunk infrastructure)

As per mapping, it is available via Urban Utilities website **here**.

SC7.2.2 Wastewater Connection area and future connection area maps (including trunk infrastructure)

As per mapping, it is available via Urban Utilities website **here**.

SCHEDULE 8 SCHEDULE OF WORKS

SC8.1 Water supply network schedule of works

SC8.1.1 Water supply network schedule of works (Brisbane)

Table SC8.1.1 Water supply network schedule of works (Brisbane)

| Establishmen cos | Est timing | Description | Project reference |
|---------------------|---------------|--|----------------------|
| \$388,512 | 2023 | Telegraph Rd, Bald Hills Water Main Augmentation | BDWDAA08C16 |
