Progress Update: Bremer River Crossing Replacement

What's happening?

Following our recent notification, the **Bremer River Pipe Replacement upgrade** between **Chermside Road Pump Station and Boundary Street, Moores Pocket** is progressing well, with the majority of works currently taking place at McLeod Street Park, Basin Pocket.

What's next?

From **Monday 13 October 2025**, crews will begin preparing for drilling activities between McLeod Street Park and Boundary Street. Once this stage is underway, the drilling equipment will be relocated to the corner of Boundary Street and Moores Pocket Road, Moores Pocket. This works will include the use of heavy vehicles and machinery such as excavators, drilling equipment, a franna crane and a hydro excavation truck.

Hours: intermittently from **13 October 2025** for up to **eight weeks**, between **6:30am and 6:00pm**, Monday to Saturday, weather and site conditions permitting.

What to expect:

- **Crew, trucks, and equipment** on the footpath and road, including **idle vehicles** parked near the worksite and at **nearby maintenance holes**. Safety barriers will be in place to keep everyone safe.
- **Changed traffic conditions** will be in place around work areas and access roads. Traffic controllers will be on site to manage access and ensure pedestrian safety.
- **Noise, vibration and dust** from construction and machinery. We will minimise this where we can.
- Some **intermittent odour** may occur when maintenance hole lids are removed or during ventilation. This is required to ensure the safety of crews working in confined spaces.
- We will **restore** all work areas as close to the original condition as possible, once the work is complete.
- There will be **no interruption** to your wastewater services as part of this work.

We appreciate your patience during these essential network upgrades. For further information, please call **Samantha** on **0419 623 548.**
