

# Manly Roles Hill Water Network Upgrade

## Preston Road and Daisy Road, Manly West

You can rely on us to keep things flowing, and from time-to-time we need to upgrade your local water network.

### What's happening?

Our delivery partner, Downer WSP and their subcontractor Hollcon, will soon start preliminary works to support the upcoming water network upgrade along Preston Road, Manly West. Construction will commence from **Wednesday 14 February 2024**, and will take up to **three weeks** to complete, weather and site conditions permitting.

Following the completion of these works, we'll soon start work to upgrade the booster pump station and associated pipework within the existing reservoir site. These works are due to take place in **May 2024**. We'll let you know prior to the start of construction; keep a look out in your letterbox for the update.

### Why is this happening?

By upgrading important infrastructure, this project will future-proof our network reliability and ensure safe, long-term service delivery to the community.

### Map of construction area

## What to expect?

**Noise/dust** - residents may experience varying noise and dust levels from construction machinery and changed vehicle movements. We'll minimise these where we can.

Residents may also experience **possible generator noise** when used to provide temporary power supply to the pump station during the commissioning process. We'll let you know in advance before this occurs.

**Hours** - we'll be working **during the day**, between **6:30 am and 6:30 pm, Monday to Saturday**. Some work may be required to take place at night to comply with approved traffic permits and to ensure the safety of crews working on main roads. We'll let you know before any night work takes place.

**Changed traffic conditions** will be in place around work areas and reservoir access roads. Traffic control will be in place to manage traffic flow, ensure pedestrian safety and maintain local access.

Please take care and observe all signposting, speed limits and any directions given by Traffic Controllers. Safety fencing, barriers and signage will be installed around work areas to keep everyone safe.

**Temporary water outages** – we'll provide at least three days' notice before any planned interruptions to your water supply. Please check your letterbox for these updates.

**Restoration** - we will restore all work areas as close to the original condition as possible once the work is complete.

**Our commitment** - the project team will minimise the construction impacts to the extent possible including managing noise and dust at the source and reviewing work methods as required.

We will keep directly impacted neighbours informed by providing regular construction updates during the project.
