Project Update: NIGHT WORK and TANKERING at Chermide Road, East Ipswich.

What's happening?

Our delivery partner, Downer WSP, and their subcontractors are currently carrying out several upgrades in your area, including pump station upgrades at **Tantivy Street, Tivoli and Chermide Road, East Ipswich.**

What's next?

We'll soon commence essential **night work**, for up to **three weeks**, to complete upgrades to the pump stations. These works will include diverting and isolating sections of the wastewater network.

To manage high network flows, **tanker trucks** will temporarily redirect wastewater from the pump station on Tantivy Street and Chermide Road, and discharge at designated maintenance holes across the Ipswich region.

Hours: intermittently from **Friday 29 November 2024 to Friday 20 December 2024**, between 7:00pm and 10:00am, Monday to Friday, weather and site conditions permitting.

What to expect:

- **Night work with crews, trucks, and equipment** on the footpath and road, including **idle vehicles** parked inside the **pump station** and at **nearby maintenance holes**. Safety barriers will be in place to keep everyone safe.
- **Changed traffic conditions**, including **tanker trucks entering and exiting the pump station**. Traffic controllers will be on site to manage access and ensure pedestrian safety.
- Noise and dust from construction and machinery. We will minimise this where we can.
- Some **intermittent odour** may occur when maintenance hole lids are removed or during ventilation. This is required to ensure the safety of crews working in confined spaces.
- There will be **no interruption** to your wastewater services as part of this work.

We appreciate your patience during these essential network upgrades. For further information, please call **Samantha** on **0419 623 548**.

If you have any questions or concerns, please contact Downer WSP at Community.Enquiries@downerwsp.com
