UrbanUtilities OSSIBLE WATER INTERRUPTION

In preparation for upgrades to the water network Urban Utilities' Delivery Partner, Diona, will be testing valves connected to the water mains in your area.

Unfortunately, this might reduce pressure or interrupt your water supply anytime between:

start .9:00am Thursday 9 January 2025 ...

Finish .9:00am Friday 10 January 2025

Permit & shut plan no. 98016 & SP82581

Contractor name & phone . Diona.....

Community Hotline 1300 13 13 38

If weather or site conditions prevent this work being done, it may occur the next working day.

THANKS FOR YOUR UNDERSTANDING AND COOPERATION WHILE WE COMPLETE THESE ESSENTIAL WORKS

POSSIBLE WATER INTERRUPTION

During valve testing, there might be a drop in pressure or loss of water for a short period.

Prior to this work, please ensure:

- you store enough drinking water to last a few hours while the work is underway
- your taps are off and appliances which use water are not operating.

After we finish, you may notice a slight change in your water colour or some air bubbles. Don't worry, this is normal and harmless. If this occurs, follow these steps:

- Turn on an outside tap and let the air escape
- Run the tap until the water looks clear (*Tip: use this water for your plants!*)
- Wait until the water is clear before you wash any light coloured clothes

For more information about water quality, visit urbanutilities.com.au/waterquality

An important note for Building Managers Some building systems like fire alarms, sprinklers, pumps and cooling towers might not work properly without water. We suggest you talk to your fire and equipment service provider before our Delivery Partner starts. They can help you get ready and avoid any problems.
