

IMPORTANT WORK ON YOUR WATER SUPPLY

Seqwater is undertaking a \$1.5 million upgrade on its water supply pipe network.

As part of this maintenance project, work will be undertaken on two pipes that supply water to Brisbane and Ipswich. This work may have some temporary impacts on your water supply.

Seqwater is the bulk water supplier in South East Queensland and Urban Utilities is responsible for delivering this treated water to homes and businesses.

Ensuring the **long-term sustainability**
of your water network.

When will the work occur?

Stage one of the works was successfully completed earlier this month, Stage two is scheduled for **Saturday 3 July to Monday 5 July 2021**.

What to expect

You may experience temporary changes to your water including taste, odour and discolouration. Your water remains safe to drink.

Seqwater and Urban Utilities are working together to maintain water supply during the works. **No loss of water should occur**. If you do experience a complete loss of water, please report this to our Faults and Emergencies line on **13 23 64**.

Building Managers: we recommend contacting the relevant fire and equipment service provider for advice about preparing your building systems before the potential pressure reduction.

If you'd like more information about this work, please visit urbanutilities.com.au/BarnesHill

What you can do

1. Save water where you can and postpone any water intensive chores like washing the car, filling up the pool or watering the garden.
2. Just like preparing for storm season, store some water in containers to cover you in the unlikely event you do lose water. Don't forget your pets too!
3. If you received a notification during the first stage of works, we're keen to hear about your experience, so please scan the QR code for our one-minute survey.
