

We're upgrading your sewer network

Elliot Road, Bundamba

You can rely on us to keep things flowing. From time-to-time we need to upgrade your local water and wastewater pipes.

What's happening?

Our delivery partner, Downer WSP, will soon commence essential works to repair and upgrade important infrastructure.

The project will involve rehabilitating a pump station located towards the end of Elliot Road, Boonah, near the intersection of East Street, and installing new assets. Work will start on **Monday 3 April 2023** and take up to **three months** to complete, weather and site conditions permitting.

Why is this happening?

The Elliot Road Pump Station Upgrade will future proof the networks' reliability and ensure safe long-term service delivery to the community for the next 50 years.

Map of construction area

What to expect?

Noise/dust - residents may experience varying levels of noise and dust from construction machinery and changed vehicle movements. We'll minimise these where we can.

Hours - We'll be working **during the day**, between **6:30am and 6:30pm, Monday to Friday**, with the occasional Saturday works. Construction is anticipated to take place for up to **three months** (weather and site conditions permitting).

Changed traffic conditions will be in place around work areas and access roads. Traffic control will be in place to manage the flow of traffic, ensure pedestrian safety and maintain local access.

Please take care and observe all signposting, speed limits and any directions given by Traffic Controllers. Safety fencing, barriers and signage will be installed around work areas to keep everyone safe.

Odour - some intermittent odour may occur during ventilation activities. This is required to ensure the safety of crews working in confined spaces.

Wastewater services – this work will not affect your service. Sewage may need to be re-directed away from the work site using tanker trucks or by-pass piping. We will notify impacted customers prior to any of these activities taking place.

A temporary work site and holding area for pipe, materials and machinery will be located near the Elliot Road Pump Station. Downer WSP will install barriers and signage around work areas to keep everyone safe.

Tree and vegetation removal - we understand local parks and resident fauna and flora are highly valued by the community. To allow for these essential works, there will be tree and vegetation removal to allow for access to the existing sewer pipe.

We have made every effort to minimise tree and vegetation removal where possible. Trees marked for removal will be removed in accordance with a qualified. These activities will be monitored by an approved Fauna Spotter.

Restoration - we will restore all work areas as close to the original condition as possible, once the work is complete.
